# TABLE OF CONTENTS

# Change log

| Date | Change Description |
|------|--------------------|
| 2025-09-29 | Initial release. |

# Introduction

This document provides release information for FortiIsolator version 3.0.1 build 0151:

- What's new on page 6
- Product integration and support on page 7
- Upgrade information
- Resolved issues
- Known issues

For more information about using FortiIsolator in general, see the FortiIsolator Administration Guide.

# What's new

FortiIsolator version 3.0.1 includes the following new features and changes:

- Significant user experience improvement with faster response and loading of isolated web pages
- HA support for registry for better redundancy
- Improved installation experience with fewer reboots
- Improved upgrade experience with new capability of configuration data migration from earlier versions
  While FortiIsolator 3.0.1 does not support direct upgrade from any earlier versions, you can now migrate your configuration data from 2.4.x or 3.0.0 to 3.0.1.
- Support for LDAP and SAML servers for user authentication
- Support for integration with FortiProxy 7.2.4

Refer to the FortiIsolator 3.0.1 Private Cloud Deployment guide and FortiIsolator 3.0.1 Administration Guide for more details.

# Product integration and support

The following table lists FortiIsolator version 3.0.1 product integration and support information:

| Type | Product and version |
|---|---|
| **Fortinet products** | • FortiGate 7.6.1 or later<br>• FortiProxy 7.2.4<br>• FortiSandbox 3.1.2 or later<br>• FortiAuthenticator 6.1<br>• FSSO 5.0 |
| **Web browsers** | • Microsoft Edge version 42 or higher<br>• Microsoft Internet Explorer version 11 (OS build 19041.867, 19042.906, 19042.928, and the most recent version)<br>• Mozilla Firefox version 65 or higher<br>• Google Chrome version 72 or higher<br>• Apple Safari version 12 or higher for macOS<br><br>Other web browsers may work correctly, but Fortinet does not support them. |
| **Virtualization environments** | • VMware vSphere 6.5 or higher<br>• VMware ESX/ESXi 6.5 or higher<br>• KVM QEMU 0.12.1 or higher |

# Upgrade information

FortiIsolator 3.0.1 build 0151 only supports fresh installations. You cannot upgrade from any earlier versions to 3.0.1. However, you can migrate your configuration data from 2.4.x or 3.0.0 to 3.0.1 after installation.

# Resolved issues

The following issues have been fixed in FortiIsolator version 3.0.1. For inquiries about a particular bug, visit the Fortinet Support website.

| Bug ID | Description |
|---|---|
| 877319, 1010519, 1136430 | Cannot log into Google account. |
| 1101036 | Browser cookies are not saved. |
| 1106251 | "500 Internal Server Error" upon editing to view SAML user group. |
| 1113024 | Attempting to login while the system is booting may result in inconsistent access capabilities. |
| 1106253 | Cannot save backup files. |
| 1113025 | Error messages during boot and reboot. |
| 964844 | Error when downloading PDF files through FortiIsolator even when scan protection is removed and file size does not exceed the configured maximum download size. |
| 1129063 | Issue with accessing WhatsApp website. |
| 1136491 | 500 server error during the login of read-only admins. |
| 1190348 | system-model resets to SASE after VM restart. |
| 1195271 | Cannot backup logs. |
| 1199460 | NTLM/LDAP authentication does not work. |
| 1195187 | SAML authentication does not work. |
| 1203129 | Cannot delete unused local CA certificates. |

# Known issues

The following issues have been identified in FortiIsolator version 3.0.1. For inquiries about a particular bug or to report a bug, visit the Fortinet Support website.

The following FortiIsolator 2.4.*x* known issues no longer apply to 3.0.1: 1128529, 877888, 887593, 887931, 899996, 1097712, 1118534, 1131046.

| Bug ID | Description |
|---|---|
| 1017625, 1136478 | Cannot play any music after logging into Spotify. |
| 1098437 | Auth cookie does not work after setting the cookie life time. |
| 1122429 | Users with any special character in the username cannot log into GUI. |
| 1137395 | When installing license file, the UI says "Note: The FortiIsolator will reboot after the license file is installed", which is wrong as no reboot is needed. |
| 1204170 | FortiIsolator cannot deliver files to Votiro even when information is filled in correctly |
| 1207570 | Mode inconsistency between CLI and GUI (CLI shows vmmode, GUI shows sase mode) causes access block |
| 1207553 | Access blocked when browsing webpages while IP forwarding works normally |
| 1206355 | Registry HA DB fails to start if both registry nodes are launched almost simultaneously. |
| 1197132 | No status indication after setting region. |
| 1196641 | Cookie is not saved even after opening in new tab or refreshing more than twice. |
| 1199595 | Redundant node data is shown in controller node list. |
| 1199996 | Unable to open some sites in IP forwarding mode. |
| 1199878 | Image can be deleted even when other regions are still using it. |
| 1204428 | Certification error on forwarding server to FortiProxy. |
| 1205005 | Secondary registry overrides the portal IP of the primary registry in HA setup, causing image upload failure. |
| 1201615 | Sites in the Web Filter category are still fully accessible with the view-only right-click menu enabled. |
| 1201629 | When saving a regex rule in Web Filter, the + operator is dropped upon re-opening or viewing the saved rule. |
