Change Log

Date	Change Description
2026-06-10	Initial release.

Introduction

FortiExplorer Go is a free mobile app that enables you to rapidly provision, deploy, and manage FortiGates from your Android device. Using FortiExplorer Go, you can provision and deploy BLE capable FortiGates with the BLE Autodiscovery feature. FortiExplorer Go can also remotely manage supported FortiGate devices registered to your FortiCare account.

This document provides release information for FortiExplorer Go version 1.2.0.

New features and changes

The following lists FortiExplorer Go version 1.2.0 new features and changes:

- Update the welcome view text.
- Add support for Android 15 and 16.
- Support push notifications from FortiGate.
- Support autofilling the password when logging into to a FortiGate.
- Support OIDC login with FortiAuthenticator. When you log in, FortiExplorer Go redirects you to a secure in-app browser to enter your credentials. Once you enter your FortiCloud credentials, you will be directed back to FortiExplorer Go.
- Add a "limited access" popup message when accessing a managed FortiGate without a FortiGate Cloud subscription.
- Remove support for biometric login.
- Remove the Map feature from the Dashboard.

Product integration and support

The following table lists product integration and support information for FortiExplorer Go version 1.2.0:

Android	FortiExplorer Go for Android requires Android 11 or later.
FortiGate and FortiWiFi	Supports deploying BLE capable models running: <ul style="list-style-type: none">• 7.0.13 and later• 7.2.6 and later• 7.4.1 and later Supports managing FortiGate and FortiWiFi devices registered to your FortiCare account.

Resolved issues

The following issues have been resolved in this release. For inquiries about a particular bug, visit the [Fortinet Support](#) website.

Bug ID	Description
908663, 957492	After changing the device name or firmware version, the new name and firmware version are not updated in the device list view after refreshing.
1015598	Double-tapping a button sometimes causes the app to crash.
1020311	The option to upgrade the firmware still shows even if the device is up-to-date.
1027114	FortiExplorer Go cannot connect to FGR-70G-5G-Dual through BLE.
1027169, 1027171	Remove non-deployed FortiGate devices from the device from device list view
1027180	The Device Type filter shows wrong results.
1032092, 1032095	Fixed app crashes.
1046596	FortiCare registration shows a successful registration message for devices that are already registered.
1048662	When using the FortiOS management interface, the Network Interfaces, Managed FortiAPs, and Managed FortiSwitches pages are unable to load.
1108579	Fixed an app crashing issue on jailbroken devices.
1135197	Fixed push notification issues.
1140588	The app often crashes when refreshing the devices list
1145087	Unable to paste a copied password into the password field.

Known issues

There are no known issues in FortiExplorer Go version 1.2.0. To report a bug, contact [Fortinet Customer Service & Support](#).
