Upgrade-only releases contain critical usability and security enhancements. We advise users to upgrade their FortiSOAR setups to the latest releases corresponding to their installed FortiSOAR versions.

*** Release 7.4.3 addresses a critical issue of connectors not working after backup and restore due to

missing 'Python' dependencies, which affects fresh installations of FortiSOAR 7.4.2. Therefore, it is highly recommended to upgrade fresh installations of 7.4.2 instances to 7.4.3.

** Release 6.4.3 has issues that have been fixed in release 6.4.4, therefore it is highly recommended that you immediately upgrade from release 6.4.3 to 6.4.4 or 7.0.0.

For the procedure to upgrade FortiSOAR, see the "Upgrade Guide" in the [FortiSOAR Documentation Library](#).
