Change log

Date	Change description
2024-09-23	FortiPhish version 24.3.0 release document.

Introduction

FortiPhish is a phishing simulation service to analyze how internal users interact with phishing emails. Use FortiPhish to create custom phishing email campaigns and monitor how users respond to them. The FortiPhish portal contains dashboards with easy-to-read data analysis monitors to view responses across campaigns, and monitor improvements over time.

What's new

The following table lists new features in FortiPhish version 24.3.0.

Feature	Description
Smart Group	FortiPhish now supports *Smart Group*, a new feature that dynamically assigns users to groups based on rules defined on user properties such as risk grade, actions, campaign interactions, and training history.
Product & IP Whitelist	A new *Product & IP Whitelist* page is added to provide details of IP addresses and domains that must be whitelisted for optimal FortiPhish functionality.
GUI Enhancements	The following GUI enhancements have been added to FortiPhish. • *Dashboard* • Added date picker to filter data by selected duration. • Added refresh option to manually refresh the data. • *Monitoring* • Updated the date picker. • *Custom Template / Landing Page* • Added a new and improved editor to create custom templates and landing pages. • *Settings* • Settings page is moved from the sub header to the left menu.

Resolved issues

The following issues have been resolved in FortiPhish version 24.3.0. For inquiries about a particular issue, visit the Fortinet Support website.

Issue ID	Description
1051446	There is a delay in email status update within FortiPhish UI, when email is sent to more than 100 users at once.
1057475	After page refresh, any link opened in a new tab is redirected to the Dashboard page.
1058050	Incorrect date and time in executive report.
1057476	*Explicitly Record Inserted* message is displayed when a user opens the mail more than once.
