Change log

Date	Change description
July 18, 2025	Initial release of the FortiFone Softclient for Android 7.0.6, build 170 Release Notes.

Introduction

This document provides a summary of new features, support information, and upgrade instructions in this FortiFone Softclient for Android 7.0.6 release, build 170.

Supported platforms

FortiVoice phone system and FortiVoice Cloud support the FortiFone Softclient for Android 7.0.6 release.

The FortiFone Softclient for Android 7.0.6 release has the following platform requirements:

- FortiVoice phone system using firmware version 6.4.10 GA or higher.
- Operating system Android version 9.0 or higher.

Upgrade information

To update to the latest FortiFone Softclient for Android release, visit the [Google Play Store](#).

What's new

The following list highlights some of the new features and enhancements introduced in the FortiFone Softclient for Android 7.0.6 release.

Feature and enhancement	Description	FortiVoice phone system	FortiVoice Cloud	See more
Authentication	RADIUS two-factor authentication now sends tokens in an email or SMS for users to log in to FortiFone Softclient for Android.	✓	—	Configuring RADIUS authentication profiles in the FortiVoice Phone System Administration Guide
Auto-provisioning FortiFone FON-W80B phones using Bluetooth	You can now auto-provision FON-W80B cordless phones that have external numbers assigned using Bluetooth-enabled device discovery in FortiFone Softclient for Android.	✓	✓	Provisioning phones using FortiFone Softclient in the FortiFone Softclient for Android User Guide
Contact* (For users logging in with email only)	The design of the Contact section of FortiFone Softclient for Android has been improved. Contact has two tabs: <ul style="list-style-type: none"> • Personal (any personal contacts imported from your FortiCloud IAM server or manually added from your phone) • People (all internal and external contacts from your FortiCloud IAM server) 	✓	✓	Working with contacts in the FortiFone Softclient for Android User Guide
Phonebook* (For users logging in with email only)	Phonebook contains the same tabs as Contact in previous release versions of FortiFone Softclient for Android: <ul style="list-style-type: none"> • Personal • Business • Directory • Phone 	✓	✓	Using the phonebook in the FortiFone Softclient for Android User Guide

Feature and enhancement	Description	FortiVoice phone system	FortiVoice Cloud	See more
	You can access Phonebook by tapping More in the navigation bar.			
Voicemail* (For users logging in with email only)	Voicemail has been moved from the navigation bar in FortiFone Softclient for Android. You can now access Voicemail by tapping More in the navigation bar.	✓	✓	Managing Voicemail in the FortiFone Softclient for Android User Guide
Universal link support added	The mobile app added universal link support for email notifications about unread chat messages.	—	✓	Receiving notifications about unread chat messages in the FortiFone Softclient for Android User Guide

* For users logging in with their extension number, the only change is that **Contact** is now called **Phonebook** in the navigation bar.

Resolved issues

The following issue is fixed in this release.

For inquiries about a particular bug, contact [Fortinet Customer Service & Support](#).

Bug ID	Description
1181253	Android: Dialing 911 from FortiFone app does not use native dialer.
1155840	Issue with Android FortiFone: FortiFone does not ring when the Android phone is locked or the app is closed.

Known issues

To report an issue, contact [Fortinet Customer Service & Support](#).
