Change log

Date	Change Description
2022-08-31	Initial release.

Introduction

This document provides information about all the log messages applicable to FortiClient 7.0.7. The logs are intended for administrators to use as reference for more information about a specific log entry and message that FortiClient generated.

FortiClient has three log types: security event, system event, and traffic. This document contains the following information:

- [Windows on page 6](#): fields that apply to FortiClient (Windows) logs
- [Linux on page 35](#): fields that apply to FortiClient (Linux) logs

Windows

FortiClient has three log types: security event, system event, and traffic. This section contains the following information for FortiClient (Windows):

- [Mandatory fields on page 6](#): fields that are mandatory to all FortiClient (Windows) logs.
- [Log fields by type on page 7](#): fields that only apply to security event logs.
- [Log message by type on page 13](#): lists each possible log message, sorted by log type and subtype.

Linux

FortiClient has three log types: security event, system event, and traffic. This section contains the following information for FortiClient (Linux):

- [Mandatory fields on page 35](#): fields that are mandatory to all FortiClient (Linux) logs.
- [Log fields by type on page 36](#): fields that only apply to security event logs.
- [Log message by type on page 39](#): lists each possible log message, sorted by log type and subtype.
