## Change log

Date	Change description
2025-02-04	FortiEdge Cloud 26.1 release version.

## About This Release

This release delivers key new features and resolves some outstanding product issues. For more information, see [New Features](#) and [Resolved issues](#).

---

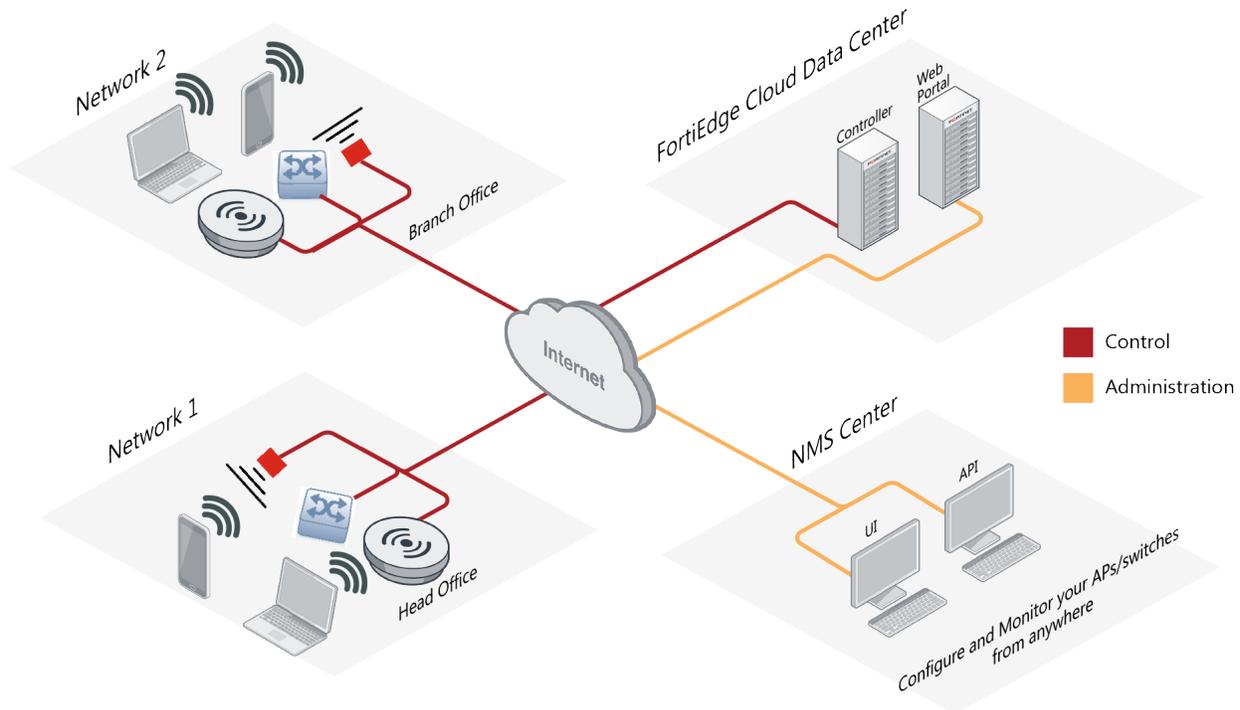

FortiEdge Cloud will no longer support multi-tenancy license extensions after December 31, 2026. Any multi-tenancy license extended will have its expiration date set to December 31, 2026, regardless of the start date.

If you currently use multi-tenancy feature, you must now transition to use the *FortiCloud Organization* feature for managing multiple entities within FortiEdge Cloud. See [FortiCloud Organization](#).

---

# What is FortiEdge Cloud

FortiEdge Cloud is a unified management platform for standalone FortiAP, FortiSwitch, and FortiExtender deployments. It provides configuration management and monitoring control for a handful of devices and can scale up to thousands of devices across multiple sites.

This document provides a list of new features, product integration information, resolved issues, and known issues for FortiEdge Cloud version 26.1. Review all sections of this document before you use this service.

## Product integration and support

The following table lists supported web browsers for FortiEdge Cloud version 26.1. Other web browsers may work correctly but Fortinet does not support them.

Item	Supported version
Windows OS	<ul style="list-style-type: none"><li>• Microsoft Edge version - 128.0.2739.67</li><li>• Mozilla Firefox version - 130.0</li><li>• Google Chrome version - 128.0.6613.120</li></ul>
MacOS	<ul style="list-style-type: none"><li>• Apple Safari version - 17.6</li></ul>

The following table lists FortiEdge Cloud language support information. Language settings are determined by region.

Language	GUI	Documentation
English	x	x
Japanese	x	—
Spanish	x	—
Portuguese	x	—

## New Features

FortiEdge Cloud 26.1 delivers the following features/enhancements to FortiEdge Cloud. For more information, see *FortiEdge Cloud User Guide for Release 26.1*.

Feature	Description
<b>Device Support</b>	<p>This release of FortiEdge Cloud now supports the following FortiAP device:</p> <ul style="list-style-type: none"> <li>• FAP-244K</li> <li>• FAP-222KL</li> </ul>
<b>LoRaWAN Profile Configuration</b>	<p>FortiEdge Cloud now supports the configuration of LoRaWAN operation profiles directly through the GUI. This allows supported FortiAPs (such as the outdoor 222KL model) to function as LoRaWAN Gateways, securely relaying traffic from IoT sensors to a LoRaWAN Network Server (LNS) over long distances.</p>
<b>Deployment Status Synchronization with FortiZTP</b>	<p>Previously, device deployment or undeployment actions performed in FortiEdge Cloud were not reflected in FortiZTP, leading to status discrepancies.</p> <p>To resolve this, FortiEdge Cloud has been enhanced to send portal-level events directly to the FortiZTP message queue. This ensures that FortiZTP now accurately reflects real-time deployment status changes initiated in FortiEdge Cloud.</p>
<b>Multiple External Access Controllers (AC) for FortiAP</b>	<p>FortiAP provisioning via FortiEdge Cloud and FortiZTP now supports the configuration of up to three external Access Controller (AC) entries, to support greater flexibility and redundancy during the discovery process.</p> <p>Administrators can now define a combination of IPv4 addresses, IPv6 addresses, and FQDNs for dispatching. Once configured, the FortiAP utilizes these entries to automatically locate and connect to the specified external controller for centralized configuration and policy management.</p> <p><b>Note:</b> FortiEdge Cloud does not determine the active Access Controller (AC) and this selection is made solely by the FortiAP.</p>

## Resolved issues

The following issues have been resolved in FortiEdge Cloud version 26.1. For inquiries about a particular issue, visit the [Fortinet Support](#) website.

Issue ID	Description
1220614	A mandatory value for the Destination field is enforced when configuring VRRP, displaying a <code>Value is required</code> alert if left blank.
1247605	IAM users encounter a <code>profile not found</code> error when attempting to create or edit profiles after switching to a different account via the Organization Tree.
1200704	The minimize option is not available on the FortiEdge console interface, forcing users to close the browser tab to exit the view.

## Known issues

The following issues have been identified in FortiEdge Cloud version 26.1. For inquiries about a particular issue, or to report an issue, visit the [Fortinet Support](#) website.

Issue ID	Description
1250310	Filtering by associated Tags is not currently supported in the <b>Switch &gt; Switches</b> window.
1250322	When configuring email notifications, the recipient list is restricted to users created within the specific Sub-OU and users from the parent or root OU are not visible.

## Additional Notes

Note the following while using FortiEdge Cloud:

- For faster GUI and API responses, Fortinet recommends deploying a total of less than 2000 switches and FortiAPs in a network. Also, the number of switch ports should be less than 15000.
- The upgrade process completion takes approximately 30 minutes if you try to upgrade multiple FortiAPs (count in 3 digits or more) simultaneously.
