Change Log

Date	Change Description
2017-05-03	Updated for 2.4.0 release.

Introduction

This document provides information about all the log messages applicable to the FortiSandbox 2.4.0 and higher. The logs are intended for administrators to be used as reference for more information about a specific log entry and message that is generated.

For more information on logs, please see the *FortiSandbox 2.4.0 Administration Guide*.

Log Information

Log Types

Type	Description	Subtype
Alert	Records virus attack and intrusion attempts.	Malware Netalet
Event	Records system and administrative events, such as downloading a backup copy of the configuration, or daemon activities.	System

Type

Each log message contains a Type (type) field that indicates its category, and in which log file it is stored.

Subtype

Each log message contains a Sub Type (subtype) field that further subdivides its category based on the feature associated with the cause of the log message.

Log Field

The following table describes the standard format in which each log type is described in this document. For documentation purposes, all log types and sub types follow this generic table format to present the log entry information.

Log Field	Log Field Description	Data Type	Length
