Change log

Date	Change description
2020-10-23	Initial release of the FortiFone IP Phone 3.0.1 Release Notes.

Introduction

This document provides a summary of new features, support information, upgrade instructions, and resolution of known issues in this FortiFone IP Phone version 3.0.1, build 123.

Supported platforms

FortiFone version 3.0.1, build 123 supports the following FortiFone IP phone model:

- FON-480

Special notices

The FortiVoice phone system requires version 6.0.6, 6.4.0, or later.

Upgrade information

To upgrade to FortiFone IP phone version 3.0.1 build 123, perform the following procedures:

Download the firmware image file

1. Go to the Fortinet Customer Service & Support website.
2. Log in to your existing account or register for an account.
3. Select **Download > Firmware Images**.
4. In **Select Product**, select **FortiFone**.
5. Click the **Download** tab.
6. Locate the firmware image file that you need to download.
7. To download the image file, go to the end of the row and click **HTTPS**.
8. Select to save the file and click **OK**.
9. Take note of the location where you saved the firmware image file on your computer.

Upgrade the FortiFone firmware

For details about upgrading the FortiFone firmware, see the FortiFone firmware upgrades section in the FortiVoice Cookbook, for the applicable FortiVoice phone system version.

What's new

The following list highlights some of the new features or enhancements introduced in the FortiFone IP phone version 3.0.1, build 123:

- Opus codec support

Resolved issues

The following issues have been fixed in this release. For inquires about a particular bug, contact Fortinet Customer Service & Support.

Bug ID	Description
657492	Use certificate from BIOS for the HTTPS client and server requests.
658865	Multicast paging intermittently working.
658867	Updating firmware notification added when phone is in screen saver mode.

Known issues

To report an issue, contact Fortinet Customer Service & Support.
