Change Log

Date	Change Description
Mar 29, 2024	Initial release.

Introduction

This document provides a list of new features and changes, and product integration support information for FortiGSLB Cloud 24.1.a. Please review all sections of this document before using this service.

What's new

FortiGSLB Cloud 24.1.a offers the following new features:

Zone file import

FortiGSLB Cloud now supports importing zone files, allowing you to enhance DNS management by uploading your locally saved zone config file to apply multiple records to a single zone domain. Key feature highlights include:

- Validating zone files against BIND format and RFC 1035 standards.
- File size limit: 1 MB.
- Meticulous parsing ensures accurate record configuration.

For more information, see Importing zone configuration files.

Support Fully Qualified Domain Names (FQDN) as Destination Address

You can now configure FQDN as a Destination Address for FortiGate Connectors and Synthetic Testing. This allows for seamless management of dynamic IP address changes without configuration adjustments, ensuring adaptability to cloud environment changes and eliminating manual updates.

For more information, see Fabric Connectors and Synthetic Testing.

Product integration and supported web browsers

This section lists the product integrations and web browsers supported by FortiGSLB Cloud 24.1.a.

Supported products for integration:

Product	Tested Versions
FortiGate	All FortiGate models running FortiOS 6.2.5 and later versions
FortiADC	FortiADC 5.4.1 and later versions

Supported web browsers:

- Mozilla Firefox 59 and later versions
- Google Chrome 65 and later versions

We strongly recommend you set either of the web browsers as your default web browser when working with FortiGSLB Cloud. You may also use other (versions of the) browsers, but you may encounter certain issues with FortiGSLB Cloud's Web GUI.

Resolved issues

The following issues have been resolved in the FortiGSLB Cloud 24.1.a release. For inquiries about particular bugs, please contact Fortinet Customer Service & Support.

Bug ID	Description
1014067	The query statistics in European or Asian regions were not aggregated.

Known issues

There are no known issues in FortiGSLB Cloud version 24.1.a. For inquiries on particular bugs, please contact Fortinet Customer Service & Support.
