Resolved issues

The following issues have been fixed in FortiOS 6.4.7. For inquiries about a particular bug, please contact [Customer Service & Support](#).

Bug ID	Description
602397	The <i>FortiSwitch Ports</i> page is slow with a large topology.
682430	An extraneous " " entry in the <code>set interface</code> command under <code>config system ntp</code> prevents the FortiLink interface from being enabled.
717506	A user was unable to add descriptions to managed FortiSwitch ports.
727035	Changes to FortiSwitch port status fail to save in the GUI.

Known issues

The following known issues have been identified with FortiOS 6.4.7. For inquiries about a particular bug or to report a bug, please contact [Fortinet Customer Service & Support](#).

Bug ID	Description
298348, 298994	Enabling the <code>hw-switch-ether-filter</code> command on the FG-92D model (the default setting) causes FortiSwitch devices to not be discovered.
527695	Starting in FortiOS 6.4.0, VLAN optimization is enabled by default (<code>set vlan-optimization enable</code> under <code>config switch-controller global</code>). On a network running FortiSwitchOS earlier than 6.0.0, this change results in a synchronization error, but the network still functions normally. If you have FortiSwitchOS 6.0.x, you can upgrade to remove the synchronization error or disable VLAN optimization. On a network with <code>set allowed-vlans-all enable</code> configured (under <code>config switch-controller vlan-policy</code>), the setting reverts to the default, which is disabled, when upgrading to FortiOS 6.4.0. If you want to maintain the <code>allowed-vlans-all</code> behavior, you can restore it after the upgrade.
586801	NetBIOS stops working when proxy ARP is configured and the access VLAN is enabled because FortiGate units do not support NetBIOS proxy.
621785	<code>user.nac-policy[].switch-scope</code> might contain a data reference to <code>switch-controller.managed-switch</code> . When this reference is set by an admin, the admin needs to remove this reference before deleting the <code>managed-switch</code> .
