

## FortiSIEM Version Compatibility for Rocky Linux Based Releases

This table describes FortiSIEM installation versions which have been tested and confirmed to work.

### Notes:

- FortiSIEM Manager, introduced in FortiSIEM 6.5.0, requires that the FortiSIEM Manager version be greater or equal to its Supervisor instances.
- In general, Collectors can be on older versions than the Supervisor. However, to take advantage of enhancements, the Collector and Supervisor must be on the same version.

## Web Browser Support and Display Resolution

FortiSIEM, like most monitoring, SIEM and analytics tools, can display a large amount of information on the screen at once. The FortiSIEM HTML GUI has chosen a larger font for legibility reasons. Hence, Fortinet recommends that users have a minimum 1680x1050 desktop display resolution.

FortiSIEM supports the following web browsers and was tested using these versions:

- Apple Safari, version 16.4
- Microsoft Edge, version 112.0.1722.68
- Google Chrome, version 113.0.5672.126
- Mozilla FireFox, version 113.0.1
