# Introduction

This document provides information about the various types of FortiAnalyzer datasets.

## Understanding datasets and macros

FortiAnalyzer datasets are collections of log messages from monitored devices.

Charts in FortiAnalyzer are generated based on the datasets. To create a chart, you can use the predefined datasets, or you can create your own custom datasets by querying the log messages in the SQL database on the FortiAnalyzer unit. Both predefined and custom datasets can be cloned, but only custom datasets can be deleted. You can also view the SQL query for a dataset, and test the query against specific devices or log arrays.

You can create custom reports that contain macros that are created based on predefined and custom datasets. Macros are used to dynamically display the device log data as text in a report. They can be embedded within a text field of a paragraph in a report layout in XML format. Macros display a single value, such as a user name, highest session count, or highest bandwidth, and so on.

For more information about how to create datasets, charts, and macros, see the FortiAnalyzer *Administration Guide*.

## Dataset Reference List

The following tables list the datasets included with FortiAnalyzer. The tables contain the name, SQL query syntax, and log category for each dataset.

| Dataset Name                           | Description                | Log Category |
|--|----------------------------|--------------|
| Traffic-Bandwidth-Summary-Day-Of-Month | Traffic bandwidth timeline | traffic      |

```
select
  $flex_timescale(timestamp) as hodex,
  sum(traffic_out) as traffic_out,
  sum(traffic_in) as traffic_in
from
  ###(select timestamp, sum(bandwidth) as bandwidth, sum(traffic_out) as traffic_out, sum

## Macro Reference List

The following table lists the available predefined macros that can be used in a report layout to display the log data as text (XML format) dynamically.

| Macro Name  | Description   | Dataset Used                       | Log Category |
|---|---|------------------------------------|--------------|
| Application Category with Highest Session Count     | Application category with the highest session count       | App-Sessions-By-Category           | Traffic      |
| Application with Highest Bandwidth                  | Application with the highest bandwidth usage              | Top-App-By-Bandwidth               | Traffic      |
| Application with Highest Session Count              | Applications with the highest session count               | Top-App-By-Sessions                | Traffic      |
| Attack with Highest Session Count                   | Attack with highest session count                         | Utm-Top-Attack-Source              | Attack       |
| Botnet with Highest Session Count                   | Botnet with the highest session count                     | Detected-Botnet                    | Traffic      |
| Destination with Highest Bandwidth                  | Destination with the highest bandwidth usage              | Top-Destinations-By-Bandwidth      | Traffic      |
| Destination with Highest Session Count              | Destination with the highest session count                | Top-Destinations-By-Sessions       | Traffic      |
| Highest Bandwidth Consumed (Application) Category   | Highest bandwidth consumed by application category        | App-Risk-App-Usage-By-Category     | Traffic      |
| Highest Bandwidth Consumed (Application)            | Highest bandwidth consumed by application                 | Top-App-By-Bandwidth               | Traffic      |
| Highest Bandwidth Consumed (Destination)            | Highest bandwidth consumed by destination                 | Top-Destinations-By-Bandwidth      | Traffic      |
| Highest Bandwidth Consumed (P2P Application)        | Highest bandwidth consumed by P2P application             | Top-P2P-App-By-Bandwidth           | Traffic      |
| Highest Bandwidth Consumed (Source)                 | Highest bandwidth consumed by source                      | Top-Users-By-Bandwidth             | Traffic      |
| Highest Bandwidth Consumed (Web Category)           | Highest bandwidth consumed by website category            | Top-Web-Category-by-Bandwidth      | Web Filter   |
| Highest Bandwidth Consumed (Website)                | Highest bandwidth consumed by website                     | Top-Web-Sites-by-Bandwidth         | Web Filter   |
| Highest Risk Application with Highest Bandwidth     | Highest risk application with the highest bandwidth usage | High-Risk-Application-By-Bandwidth | Traffic      |
| Highest Risk Application with Highest Session Count | Highest risk application with the highest session count   | High-Risk-Application-By-Sessions  | Traffic      |

| Macro Name   | Description  | Dataset Used                  | Log Category |
|--|--|-------------------------------|--------------|
