Change log

Date	Change description
2022-01-28	Initial release of the FortiVoice Cloud 22.1.0 Release Notes.

Introduction

FortiVoice Cloud offers robust and secure cloud communications without the purchase and maintenance of PBX hardware. Its subscription-based services reduce IT resource needs and enable with quick deployment. With FortiVoice Cloud's all-inclusive calling, conferencing, and chat, you connect your teams together faster and more easily regardless of their locations. Simply connect the cloud-ready FortiFone desk phones to your internet connection or install FortiFone Softclient on computers or smart phones.

This document provides a summary of key features and known issues for FortiVoice Cloud version 22.1.0.

Solution support and integration

- FortiFone IP phone models:
 - FON-380
 - FON-480
 - FON-580
- FortiFone softclient (mobile and desktop)
- Standard and premium extensions
- FortiVoice integration with Microsoft Teams

Special notices

Monitor settings for web UI

To view all objects in the web UI properly, Fortinet recommends setting your monitor to a screen resolution of at least 1280x1024 pixels.

Recommended web browsers

- Google Chrome: 97
- Mozilla FireFox 96
- Microsoft Edge 97
- Apple Safari 15

What's new

The following list highlights the key features introduced in FortiVoice Cloud version 22.1.0:

- **Enterprise-grade Quality of Service for business continuity**
Fortinet cloud services and data centers are protected by Fortinet security and monitored by the security experts to deliver the highest uptime possible. FortiVoice Cloud is built on the latest security and encryption technologies to secure your conversations and data. Your FortiVoice service is safeguarded with automatic disaster recovery and local survivability via a public switched telephone network (PSTN) connection to reduce business disruption.
- **All-inclusive and affordable communications**
FortiVoice Cloud offers everything you need with simple subscriptions. Pay only for what fits your business and budget needs. It includes robust voice, conferencing, and chat in one integrated solution. FortiVoice Cloud delivers all the latest features automatically.
- **Connect from anywhere, anytime**
FortiVoice Cloud comes with the FortiFone Softclient for smart phones and computers. This easy-to-use application gives you the flexibility to stay connected and access robust communications. You can easily make and receive calls, start an instant message, or join a conference meeting directly from your FortiFone Softclient, in the office, at home, or on the road.
- **Simplified management and configuration**
FortiVoice Cloud makes it easy for IT to activate and deploy services for all users from an intuitive web management console. You can configure FortiVoice remotely and have visibility into system performance across locations and devices.
- **End-to-end protection from a trusted security vendor**
FortiVoice Cloud services include advanced security and encryption features. FortiVoice integrates seamlessly with Fortinet security products like FortiGate Next-generation Firewalls and Fortinet SD-WAN. Fortinet is the only vendor that delivers end-to-end integrated security protection across network infrastructure and phone communications.

Known issues

This release has no known issues.
