Change log

Date	Change description
2020-04-14	FortiInsight version 6.0.0 document release.

Introduction

This document provides the following information for FortiInsight version 6.0.0:

- [What's new in FortiInsight version 6.0.0](#)
- [Upgrade information](#)
- [Product integration and support](#)
- [Resolved issues](#)
- [Known issues](#)

What's new in FortiInsight version 6.0.0

The following table lists new features and enhancements in FortiInsight version 6.0.0.

Feature	Description
Redesigned notifications	Notifications have been redesigned and are now stackable in the UI <ol style="list-style-type: none">Instead of receiving UI notifications at the top of the UI, they are now much more compact and situated on the lower left.These will also stack if you receive multiple notifications at once, allowing you to see them much clearer.
User experience enhancement	Load on demand to enhance the user experience Analysis and processing are now much more scalable. This ensures events, and alerts are processed and available more quickly.
Menu specific items	Removed high-level Alerts menu item in favor of AI, and Policy specific menu items <ul style="list-style-type: none">We have updated the Menu so that the Alerts are now local to the individual components for AI, and Policy.
Implicit feedback for AI module	We have now built-in implicit feedback monitoring for the AI module. This means that if you click on an AI Alert, the AI module will be notified of your interest and begin to learn more robustly based on this information.
5.3.0 Windows Endpoint Collector	Added support for more robust collection of Network Events.

For more information about new features, see the [FortiInsight Administration Guide](#).

Upgrade information

Supported upgrade paths

FortiInsight version 5.2.0 supports the following upgrade path:

- Version 5.2.0 → Version 6.0.0

Product integration and support

FortiInsight version 6.0.0 support

The following table lists product integration and support information for FortiInsight version 6.0.0.

Component	Requirement
Endpoint agent support	FortiInsight provides endpoint agents for the following platforms: <ul style="list-style-type: none">• Windows 7 and later (32-bit and 64-bit)• Windows Server 2008 and later (32-bit and 64-bit)
Endpoint computers	<ul style="list-style-type: none">• 1.0 GHz CPU - x86 or x64 (agent uses 0.1% to 5%)• 1 GB RAM (agent uses 10 to 30 MB)• 20 MB free disk space (more space is needed to store compressed and encrypted offline events)
Browser	<ul style="list-style-type: none">• Google Chrome (recommended)• Chromium• Mozilla Firefox• Microsoft Edge• Apple Safari Other web browsers may work correctly, but FortiInsight does not support them.
Input devices	The FortiInsight UI is not optimized to use with touch devices. We recommend using a keyboard and mouse as the input devices for interacting with the UI.

Resolved issues

There are no resolved issues for FortiInsight 6.0.0.

Known issues

The following issues have been identified in FortiInsight version 6.0.0:

Bug ID	Description
0588814	Machine name can only be searched in lowercase.
0588817	File shares not resolved.
