Change log

Date	Change Description
2026-01-30	Initial release.

FortiAnalyzer Cloud 7.6.6 release

This document provides information about FortiAnalyzer Cloud version 7.6.6 build 3654.

The recommended minimum screen resolution for the FortiAnalyzer Cloud GUI is 1920 x 1080. Please adjust the screen resolution accordingly. Otherwise, the GUI may not display properly.

Special notices

This section highlights some of the operational changes that administrators should be aware of in FortiAnalyzer Cloud version 7.6.6.

FortiClient logging

When configuring logging from FortiClient to FortiAnalyzer Cloud, you must manually enter the fully qualified domain name (FQDN) of the FortiAnalyzer Cloud instance in the *IP Address/Hostname* field. It is important that this information is entered accurately to ensure your data is sent to the correct FortiAnalyzer Cloud instance.

For more information on configuring FortiClient logging to FortiAnalyzer Cloud, see the [FortiClient documentation on the Fortinet Docs Library](#).

Upgrade information

A notification is displayed in the FortiAnalyzer Cloud notification drawer when a new version of the firmware is available. You can choose to upgrade immediately or schedule the upgrade for a later date.

In FortiAnalyzer Cloud 7.4.3 and later, administrators must perform firmware upgrades from within the FortiAnalyzer Cloud Dashboard or firmware upgrade notification drawer.

An administrator with Super_User permissions is required to perform the upgrade.

To keep FortiAnalyzer Cloud secure and up to date, it is recommended that you upgrade your 7.6 release to the latest release build.

An email will be sent to notify you when an upgrade is mandatory. After receiving the notification, you will have 14 days to complete the upgrade. See [Mandatory upgrades](#) on page 8.

To upgrade firmware from the notification drawer:

1. Go to FortiAnalyzer Cloud (<https://fortianalyzer.forticloud.com/>), and use your FortiCloud account credentials to log in. An administrator with Super_User permissions is required to perform the upgrade.
2. Expand the notification drawer to view information about available firmware upgrades.

The screenshot shows the FortiAnalyzer Cloud interface. On the left is a navigation menu with options like Dashboards, Status, SOC Dashboard, Endpoint Vulnerability, Device Manager, FortiView, Log View, Fabric View, Incidents & Events, FortiAI, Reports, and System Settings. The main area displays system information for a device named 'FAZ-K85-CLOUD', including host name, serial number, platform type, HA status, system time, and current administrator. A notification drawer is open on the right, showing two notifications: 'FortiAnalyzer Cloud New Firmware Version' with a 'Upgrade Firmware' button, and 'Upcoming Maintenance Notice' regarding a scheduled maintenance period from June 14th, 2025, 02:00 UTC to 02:30 UTC.

3. Click *Upgrade Firmware* to update the firmware immediately or to schedule upgrade of the firmware for a later date.

Firmware Management

Please initiate a firmware upgrade here. The upgrade task will be automatically scheduled upon your request. Be sure to schedule your upgrade within the next 7 days.

Current Version v7.6.2 build6071 (Feature)

Select Firmware v7.6.3-build3492.250421 (GA.F)

Upgrade Time

4. Click *OK* to perform or schedule the upgrade.

To upgrade firmware from the Dashboard:

1. Log in to your FortiAnalyzer Cloud instance.
2. Go to *Dashboard* in the tree menu.
3. In the *System Information* widget, select the upgrade icon next to the firmware version.
The *Firmware Management* dialog appears. The current firmware version is displayed along with upgrade options.
4. In the *Select Firmware* field, choose an available firmware version.
5. In the *Upgrade Time* choose *Now* or *Later*.
 - *Now*: Begin the upgrade immediately.
 - *Later*: Schedule the upgrade for a later time.
6. Click *OK*. The upgrade will be completed based on the selected options.

FortiAnalyzer Cloud upgrade path

When upgrading FortiAnalyzer Cloud between major/minor versions, you must first upgrade to the latest patch release for the current version and any intermediate versions.

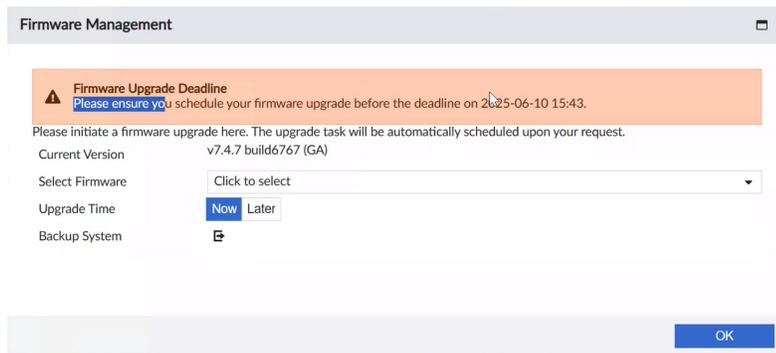

For example, in order to upgrade FortiAnalyzer Cloud from version 7.2.x to 7.6.x, you must first upgrade to the latest 7.2 patch version, followed by the latest 7.4 patch version, before finally upgrading to the target 7.6.x release.

The FortiAnalyzer Cloud firmware version selection menu only displays the next eligible version that your instance can be upgraded to in the path. In the example above, the 7.4 firmware would not be displayed as an option until you have updated to the latest available 7.2 patch version.

Mandatory upgrades

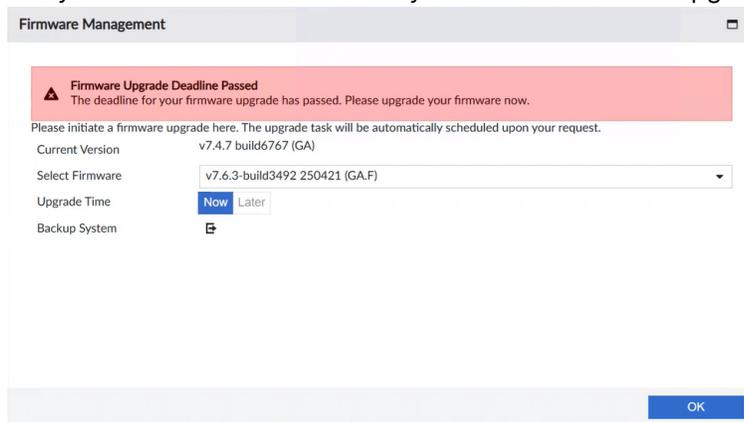

When a firmware upgrade is mandatory, a *Firmware Management* dialog window will appear when you access your instance. This dialog provides details about the upgrade deadline and options for upgrading your firmware

version. You can choose to upgrade immediately or schedule the upgrade for a later time. This dialog cannot be bypassed.

The screenshot shows a 'Firmware Management' dialog window. At the top, there is a warning banner with a triangle icon and the text 'Firmware Upgrade Deadline'. Below the banner, it says 'Please ensure you schedule your firmware upgrade before the deadline on 2025-06-10 15:43.' Below this, there is a message: 'Please initiate a firmware upgrade here. The upgrade task will be automatically scheduled upon your request.' The dialog contains several fields: 'Current Version' is 'v7.4.7 build6767 (GA)'; 'Select Firmware' is a dropdown menu with 'Click to select'; 'Upgrade Time' has two buttons, 'Now' and 'Later'; and 'Backup System' has a checkbox. An 'OK' button is at the bottom right.

After the deadline has passed, you can still connect to your instance's GUI to see the *Firmware Management* dialog window, however, you will only have the option to upgrade immediately. This dialog cannot be bypassed and you will not be able to access your instance until the upgrade is completed.

The screenshot shows the same 'Firmware Management' dialog window, but the warning banner is now red and says 'Firmware Upgrade Deadline Passed'. Below the banner, it says 'The deadline for your firmware upgrade has passed. Please upgrade your firmware now.' The message below the banner is the same: 'Please initiate a firmware upgrade here. The upgrade task will be automatically scheduled upon your request.' The fields are: 'Current Version' is 'v7.4.7 build6767 (GA)'; 'Select Firmware' is a dropdown menu with 'v7.6.3-build3492 250421 (GA.F)'; 'Upgrade Time' has two buttons, 'Now' and 'Later'; and 'Backup System' has a checkbox. An 'OK' button is at the bottom right.

Downgrading to previous versions

Downgrade to previous versions of FortiAnalyzer Cloud firmware is not supported.

Product integration and support

This section lists FortiAnalyzer Cloud 7.6.6 support of other Fortinet products. It also identifies what FortiAnalyzer Cloud features are supported for log devices and what languages FortiAnalyzer Cloud GUI and reports support.

The section contains the following topics:

- [Software support on page 10](#)
- [Feature support on page 13](#)
- [Language support on page 13](#)
- [Model support on page 14](#)

Software support

FortiAnalyzer Cloud 7.6.6 supports the following software:

- [Web browser support on page 10](#)
- [FortiOS support on page 10](#)
- [FortiClient support on page 11](#)
- [FortiEndpoint support on page 11](#)
- [FortiMail support on page 11](#)
- [FortiWeb support on page 11](#)
- [FortiNDR support on page 13](#)

Web browser support

FortiAnalyzer Cloud version 7.6.6 supports the following web browsers:

- Microsoft Edge 114
- Mozilla Firefox version 96
- Google Chrome version 114

Other web browsers may function correctly, but are not supported by Fortinet.

FortiOS support

FortiAnalyzer Cloud version 7.6.6 supports the following FortiOS versions:

See the [FortiAnalyzer 7.6.6 Release Notes](#) for the latest supported FortiOS versions.

- 7.6.0 and later.
- 7.4.0 and later
- 7.2.0 and later

FortiClient support

FortiAnalyzer Cloud version 7.6.6 supports the following FortiClient versions:

See the [FortiAnalyzer 7.6.6 Release Notes](#) for the latest supported FortiClient 7.0 versions.

- 7.4.0 and later
- 7.2.0 and later
- 7.0.3 and later

FortiEndpoint support

FortiAnalyzer Cloud version 7.6.6 supports FortiEndpoint.

FortiMail support

FortiAnalyzer Cloud version 7.6.6 supports the following FortiMail versions:

See the [FortiAnalyzer 7.6.6 Release Notes](#) for the latest supported FortiMail versions.

- 7.6.0 and later
- 7.4.0 and later
- 7.2.0 and later

FortiWeb support

FortiAnalyzer Cloud version 7.6.6 supports the following FortiWeb versions:

See the [FortiAnalyzer 7.6.6 Release Notes](#) for the latest supported FortiMail versions.

- 7.6.0 and later
- 7.4.0 and later
- 7.2.0 and later
- 7.0.0 and later

FortiNDR support

FortiAnalyzer Cloud version 7.6.6 supports the following FortiNDR versions:

- 7.6.3 and later

Feature support

FortiAnalyzer Cloud version 7.6.6 provides the following feature support:

Platform	Log View	FortiView	Event Management	Reports
FortiGate	✓	✓	✓	✓
FortiClient EMS	✓	✓	✓	✓
FortiEndpoint	✓	✓	✓	✓
FortiMail	✓	✓	✓	✓
FortiWeb	✓	✓	✓	✓

Language support

The following table lists FortiAnalyzer Cloud language support information.

Language	GUI	Reports
English	✓	✓
Chinese (Simplified)	✓	✓
Chinese (Traditional)	✓	✓
French	✓	✓
Hebrew		✓
Hungarian		✓
Japanese	✓	✓
Korean	✓	✓

Language	GUI	Reports
Russian		✓
Spanish	✓	✓

To change the FortiAnalyzer Cloud language setting, go to *System Settings > Admin > Admin Settings*, in *Administrative Settings > Language* select the desired language from the drop-down list. The default value is *Auto Detect*.

Russian, Hebrew, and Hungarian are not included in the default report languages. You can create your own language translation files for these languages by exporting a predefined language from FortiAnalyzer Cloud, modifying the text to a different language, saving the file as a different language name, and then importing the file into FortiAnalyzer Cloud. For more information, see the *FortiAnalyzer Administration Guide*.

Model support

FortiAnalyzer Cloud supports the same FortiGate, FortiMail, and FortiWeb models as FortiAnalyzer 7.6.6. For a list of supported models, see the [FortiAnalyzer 7.6.6 Release Notes](#) on the [Document Library](#).

Resolved issues

There are no resolved issues identified for the release of FortiAnalyzer Cloud 7.6.6.

Known issues

Known issues are organized into the following categories:

- [New known issues](#)
- [Existing known issues](#)

To inquire about a particular bug or to report a bug, please contact [Fortinet Customer Service & Support](#).

New known issues

No new issues have been identified in version 7.6.6.

Existing known issues

The following issues have been identified in a previous version of FortiAnalyzer Cloud and remain in FortiAnalyzer Cloud 7.6.6.

Device Manager

Bug ID	Description
1227977	Adding FortiSASE devices results in error The device's serial number does not match database.

Fabric View

Bug ID	Description
1231421	Playbook fail to run for downstream FortiGates in Security Fabric.
1236262	FortiOS Connector does not appear under the correct Security Fabric name.

FortiSoC

Bug ID	Description
1202951	Outbreak Alerts Page displays "The report list is unavailable in FortiGuard" despite Valid License and Connectivity.

FortiView

Bug ID	Description
1092311	FortiAnalyzer may not display any data when accessing <i>FortiView</i> in the VPN site-to-site tab.

Others

Bug ID	Description
1217641	The output of the 'diagnose fortilogd logvol-adom' is not correct.

Reports

Bug ID	Description
1127015	FortiAnalyzer report charts are shifted if Print Orientation is set to "Portrait".
1218711	FortiAnalyzer could not get vulnerability information from the FortiClient using playbooks.
1224929	Following the upgrade, the data shown in the VPN reports Top 5 Site-to-Site IPsec Tunnels by Bandwidth chart appears to be inaccurate.

System Settings

Bug ID	Description
1142016	The <i>Index Fetched Logs</i> feature in <i>Request Fetch</i> under <i>Advanced > Log Fetch</i> is not functioning as expected.
1220686	SAML SSO synchronization prevents admin SSO login after HA failover.

Limitations of FortiAnalyzer Cloud

All FortiAnalyzer modules are supported in FortiAnalyzer Cloud; however, the following features are not supported or are not relevant to the FortiAnalyzer Cloud deployment at this time:

- Logging Topology
- ADOMs
- Advanced ADOM mode
- High-Availability Mode
- Log Forwarding: FortiAnalyzer Cloud does not support log forwarding, except when integrated with *FortiCare Elite Services* or *SOCaaS*—logs can then be forwarded only to the respective service portals.
- Syslog logging from third-party devices: Syslog logging from third-party devices is supported using log forwarding from an on-premise FortiAnalyzer only.
- Logging from FortiClient EMS for Chromebook
- Fetcher Management
- Remote Certificates
- The FortiAnalyzer Cloud Dashboard widget availability differs from on-premises FortiAnalyzer:
 - The License Information widget is replaced with the Service Information widget which includes differences from on-premises FortiAnalyzer. For more information, see [Storage quota and disk usage on page 22](#).
 - FortiAnalyzer Cloud does not support the *System Resources*, *Unit Operation*, *Alert Message Console*, *Disk I/O*, and *Disk Quota Usage* widgets.
 - FortiAnalyzer Cloud includes *Historical Log Rate*, *Average Log Rate*, *Average Quota*, and *Historical Quota Usage* widgets that are not available in on-premises FortiAnalyzers.
- Remote Authentication Server
- SAML SSO
- SNMP monitoring tool
- FortiAnalyzer Cloud cannot be used as a managed device on FortiManager.
- Trusted Hosts
- Upload logs to cloud storage
- Security Rating Compliance Reports
- Pre-login banners
- FortiAnalyzer Cloud can not be configured as Supervisor in a FortiAnalyzer Fabric.

FortiAnalyzer Cloud supports logs from FortiGate devices and non-FortiGate devices, such as FortiClient.

FortiAnalyzer Cloud can be integrated into the Cloud Security Fabric when the root FortiGate is running firmware version 6.4.4 or later.

The FortiAnalyzer Cloud portal does not support IAM user groups.

Logging support and daily log limits

The daily log limits available for FortiGate devices depend on the device platform. These daily log limits can be expanded with an additional storage license. Adding additional storage licenses also enables FortiAnalyzer Cloud to receive logs from other supported devices like FortiClient and FortiMail.

- [FortiGate and FortiWeb devices on page 20](#)
- [Additional Storage licenses on page 21](#)
- [Daily log limits for non-FortiGate/FortiWeb devices on page 21](#)

For more information on licensing and SKUs, see the [FortiAnalyzer Cloud Deployment Guide](#) and [FortiAnalyzer Cloud Datasheet](#).

FortiGate and FortiWeb devices

FortiAnalyzer Cloud supports logs from FortiGate and FortiWeb devices. Each FortiGate or FortiWeb device with an entitlement is allowed a fixed daily rate of logging.

When determining the daily log limit for FortiAnalyzer Cloud, the form factor of the model determines the log limits. The chart below identifies some models for each form factor as an example. It is not an exhaustive list.

The following rates are based on the FortiAnalyzer Cloud a la carte subscription:

FortiGate

Form Factor	Example FortiGate Model	Total daily log limit	Rate limit quota
Desktop or FGT-VM models with 2 CPU	FortiGate 30 series, FortiGate 90 series	200MB/Day	6 logs/second
1RU or FGT-VM models with 4 CPU	FortiGate 100 series, FortiGate 600 series, FortiGate 800 series, FortiGate 900 series	1GB/Day	30 logs/second
2 RU and above or FGT-VM models with 8 CPU and above	FortiGate 1000 series and higher	5GB/Day	150 logs/second

FortiWeb

Form Factor	Example FortiWeb Model	Total daily log limit	Rate limit quota
Desktop or FWB-VM models with 2 CPU or less	FWB-100F FWB-VM (2 CPU or less)	1GB/Day	20 logs/second
1RU and above or FWB-VM models with 4 CPU or higher	FWB-400F FWB-600F FWB-1000F FWB-2000F FWB-3000F FWB-4000F FWB-VM (4 CPU or higher)	5GB/day	100 logs/second

Once the limit has been reached, users must purchase additional storage in order for FortiAnalyzer Cloud to maintain logs for 12 months. You can purchase additional storage licenses to expand the daily logging limits for your FortiGate and FortiWeb devices. For more information about daily log limits included with additional storage licenses, see [Additional Storage licenses on page 21](#).

Additional Storage licenses

Additional storage licenses are available to expand the base daily logging limits. Multiple of the same SKU may be combined.

Added daily log limit	SKU	Rate limit quota
+5 GB/day	FC1-10-AZCLD-463-01-DD	150 logs/second
+50 GB/day	FC2-10-AZCLD-463-01-DD	1500 logs/second
+500 GB/day	FC3-10-AZCLD-463-01-DD	15000 logs/second

Daily log limits for non-FortiGate/FortiWeb devices

Purchasing any of the additional storage licenses above (for example, FC1-10-AZCLD-463-01-DD) also enables FortiAnalyzer Cloud to receive logs from FortiClient and FortiMail in addition to expanding the amount of logs it may store from FortiGates.

Storage add-on licenses

The impact of storage add-on licenses depends on whether FortiAnalyzer Cloud is receiving logs from FortiGate devices.

To see information about FortiAnalyzer Cloud licensing, see the [FortiAnalyzer Cloud Deployment guide](#).

Storage quota and disk usage

The *Service Information* widget on the FortiAnalyzer Cloud Dashboard displays the following information:

Description	The service description.
Expiration Date	The expiration date of the license.
Quota	<p>Quota displays the current day's storage entitlement and usage. This includes storage space used by both raw logs and database logs. Click the list icon to see a breakdown of quota usage over the past 7 days.</p> <hr/> <p style="text-align: center;">Quota field calculation</p> <div style="display: flex; align-items: center;"> <p>The <i>Quota</i> field on FortiAnalyzer Cloud differs from the <i>GB/Day</i> field and <code>diagnose fortilogd logvol-adom all</code> command in on-premise FortiAnalyzers which only shows the <i>raw log volume</i> for the last 7 days.</p> </div>
Disk Usage	Displays the amount of disk currently being used as well as the total available disk size.
FortiGuard	<p>Displays the licensing status and entitlement usage of add-on services for FortiAnalyzer Cloud, including:</p> <ul style="list-style-type: none"> • Security Rating Update • Industrial Security Service

Information about other Dashboard widgets shared between on-premises FortiAnalyzer and FortiAnalyzer Cloud can be found in the [FortiAnalyzer Administration Guide](#).

Log insertion rate limits

FortiAnalyzer Cloud uses log rate limits to determine the maximum number of logs that can be inserted into its database per second.

The following are used to determine the number of logs that are supported:

Sustained log rate	The supported number of logs that FortiAnalyzer Cloud can receive per second over a sustained period of time.
Peak log rate/Rate limit	The maximum number of logs that FortiAnalyzer Cloud can insert into the database per second when there is a log rate restriction.
Tokens	FortiAnalyzer Cloud includes tokens which are consumed to allow FortiAnalyzer Cloud to temporarily surpass the peak log rate. See Exceeding log rate limits on page 24 .

The supported log rates included with your FortiAnalyzer Cloud subscription is determined by your per-logging-device entitlements and any add-on storage SKUs added to FortiAnalyzer Cloud. For more information, see [Logging support and daily log limits on page 20](#).

This topic includes the following information:

- [Viewing log rates limits and tokens on page 23](#)
- [How tokens are calculated on page 24](#)
- [Exceeding log rate limits on page 24](#)

Viewing log rates limits and tokens

You can view your supported log rates and tokens in the FortiAnalyzer Cloud CLI.

To view the sustained and peak rate limit:

1. Sign in to FortiAnalyzer Cloud.
2. Select your username in the toolbar, and click *CLI*.
3. Enter the following command:

```
get system loglimits
```

The *Peak Log Rate* and *Sustained Log Rate* is displayed for your FortiAnalyzer Cloud instance

```
GB/day           : 6
Peak Log Rate    : 156
Sustained Log Rate : 104
```

To view token usage and dropped logs:

1. Sign in to FortiAnalyzer Cloud.
2. Select your username in the toolbar, and click *CLI*.
3. Enter the following command:

```
diag log ratelimit
```

FortiAnalyzer Cloud displays information about the rate limit, tokens, and dropped logs.

```
Log rate limiting info for database insert
=====
Rate Limit: 156(log/sec)
Tokens: current=570,958 max=13,478,400 refill-interval=60(sec) refill-due=37(sec)
Dropped Logs: last-minute=0 since-sys-up=0
```

Rate Limit	The maximum number of logs that FortiAnalyzer Cloud per second. This is the same as the <i>Peak Log Rate</i> .
Tokens	current: The number of tokens currently available. max: The maximum number of tokens available in a 24 hour period. refill-Interval: The amount of time between each token refill. refill-due: The amount of time remaining until the next token refill. When the refill-due amount reaches 0, the tokens will be refilled.
Dropped Logs	last-minute: The number of logs dropped in the last minute. since-sys-up: The number of logs dropped since the system was started.

How tokens are calculated

FortiAnalyzer Cloud rate limit tokens are calculated as follows. The following examples use a rate limit of 156. This rate limit will vary depending on your license.

- The total tokens available per day: $\text{rate limit} \times 60 \text{ seconds} \times 60 \text{ minutes} \times 24 \text{ hours} = \text{max tokens}$
Example: $156 \times 60 \times 60 \times 24 = 13,478,400$
- The initial available tokens that the system assigns (1 hour worth of tokens): $\text{rate limit} \times 60 \text{ seconds} \times 60 \text{ minutes} = \text{initial tokens}$
Example: $156 \times 60 \times 60 = 561,600$
- The amount of token added at each refill: $\text{rate limit} \times 60 \text{ seconds} = \text{token refill}$
Example: $156 \times 60 = 9,360$

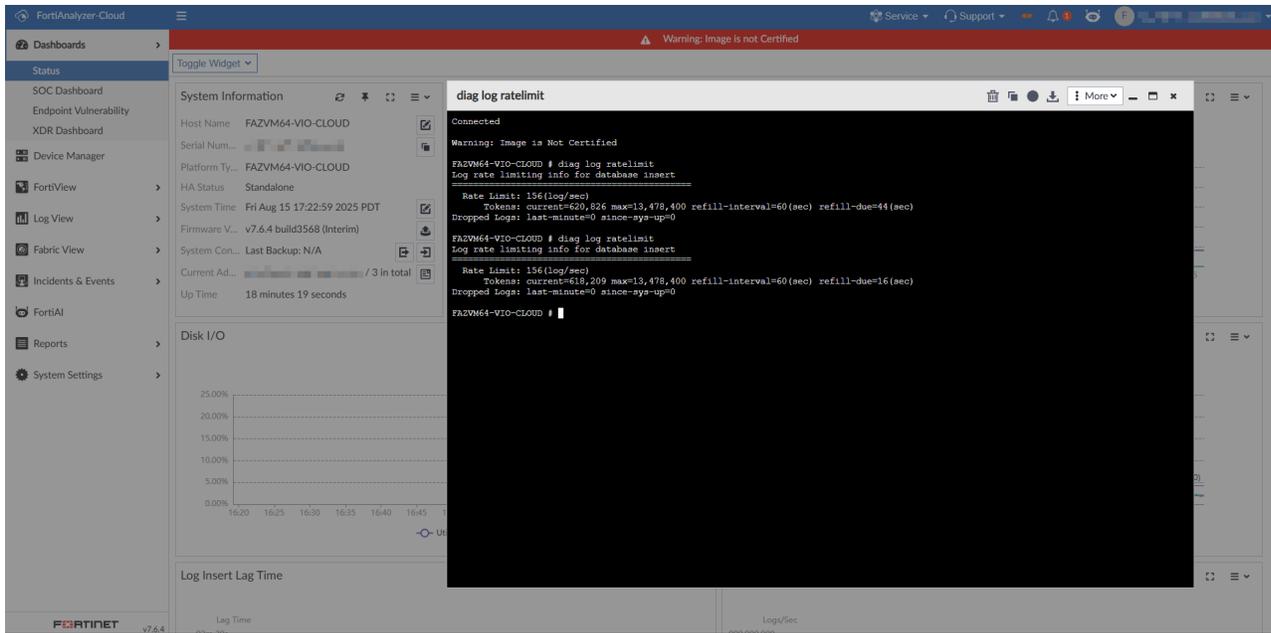

Exceeding log rate limits

FortiAnalyzer Cloud includes log rate tokens which are consumed to allow your FortiAnalyzer Cloud instance to temporarily surpass its peak log rate limit. This allows FortiAnalyzer Cloud to receive long logs or support short bursts of increased logging without dropping logs.

The number of tokens included with your FortiAnalyzer Cloud instance is determined based on your license, and are refilled each minute by a specified amount. See [Viewing log rates limits and tokens on page 23](#).

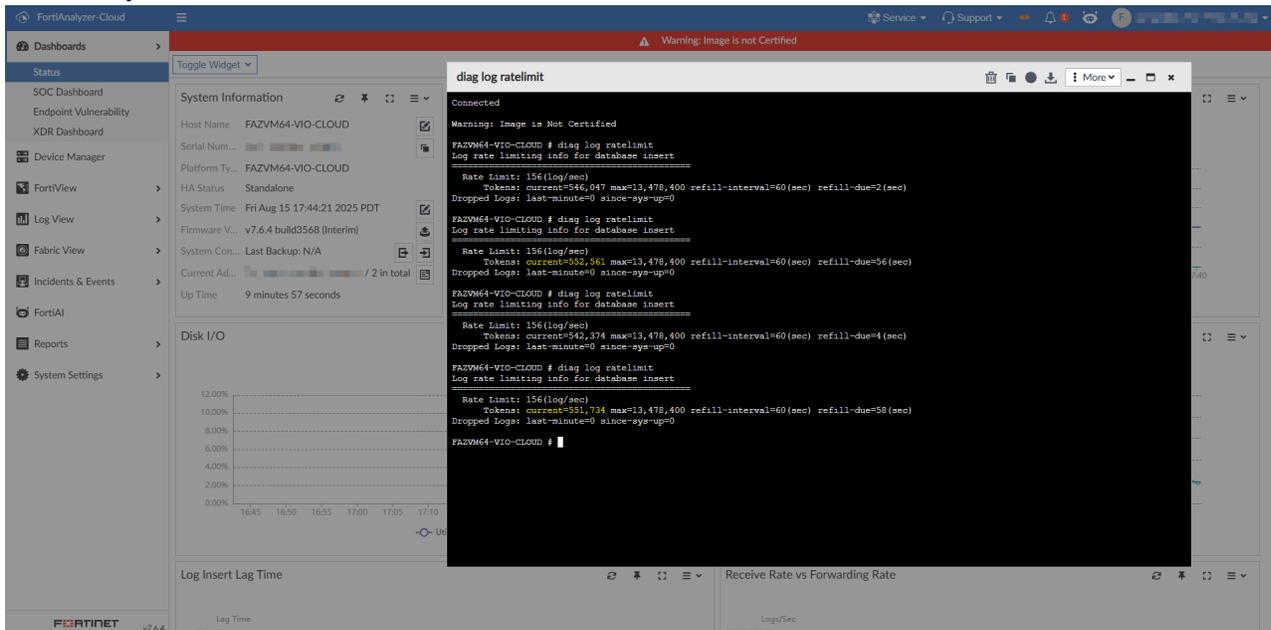

How tokens are consumed:

- Each log received by FortiAnalyzer Cloud that is greater than or equal to the log rate limit consumes one token.

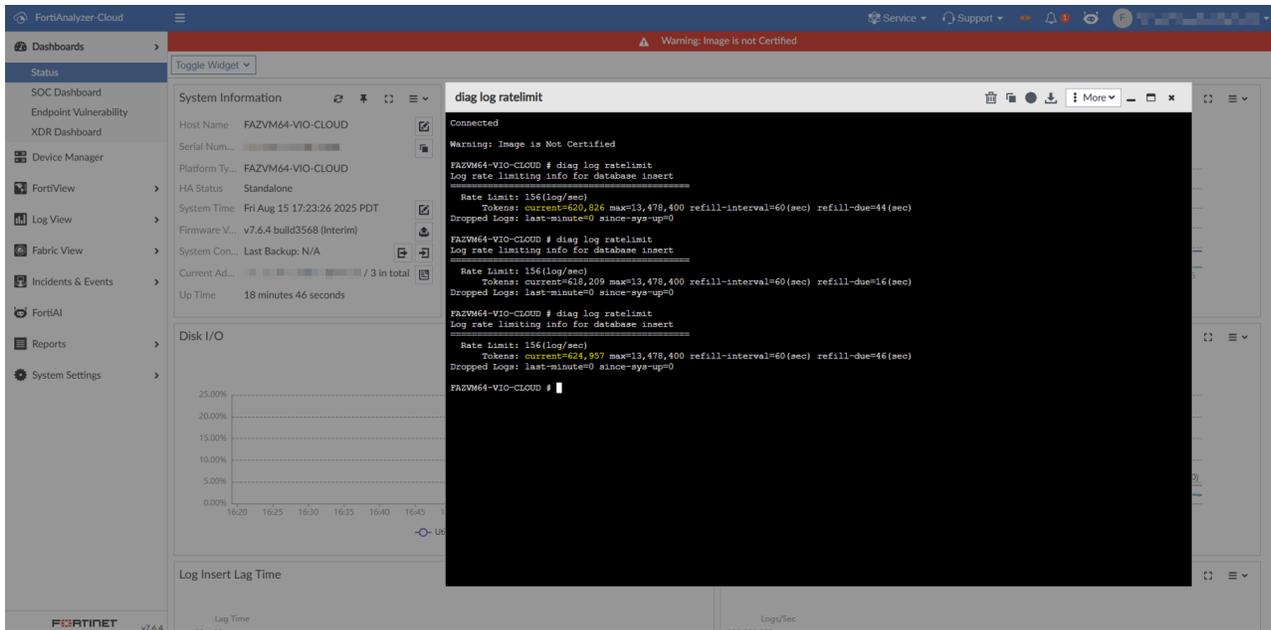

- When the received log rate is greater than or equal to the rate limit, the current token amount will be reduced as long as logs continue to arrive in FortiAnalyzer Cloud.

In the following example, the *log receiving rate* is 200 logs /sec which is greater than the *log rate limit* of 156 logs/sec. When the token refill occurs after one minute, the number of available tokens has been reduced by 827.

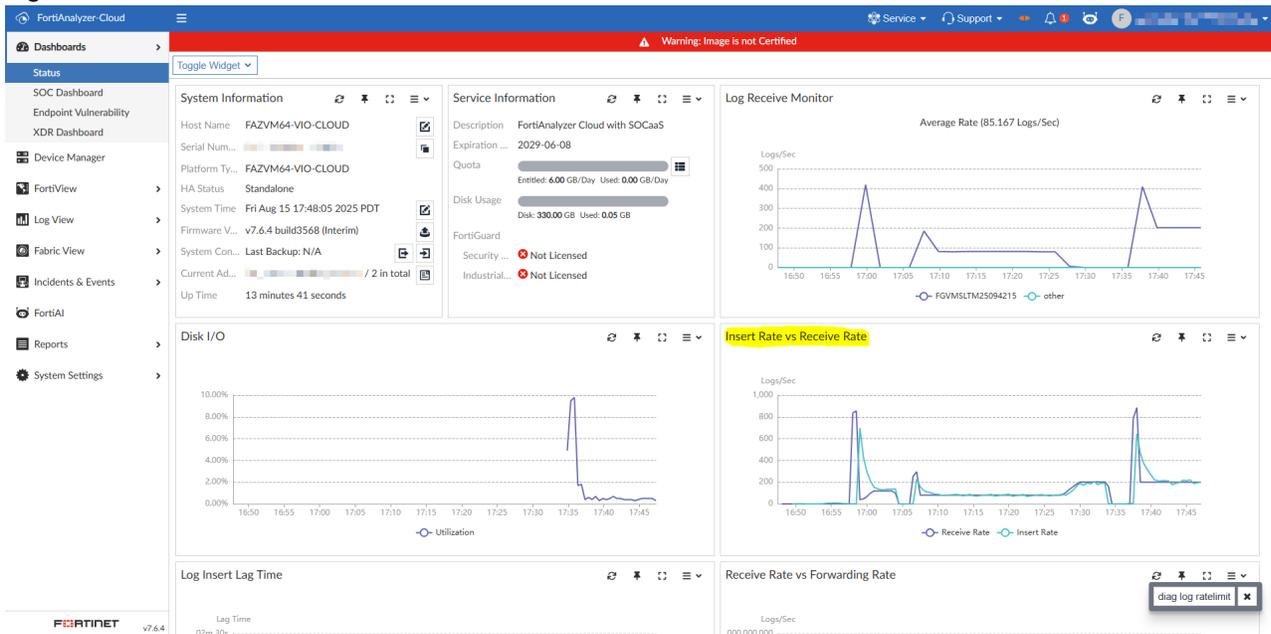

- When the received log rate is less than the rate limit, the token refill speed is faster than the consumption speed.

In the following example, the *log receiving rate* is 80 logs/sec which is less than the *log rate limit* of 156 logs/sec. When the token refill occurs after one minute, the number of available tokens is increased by 4131.

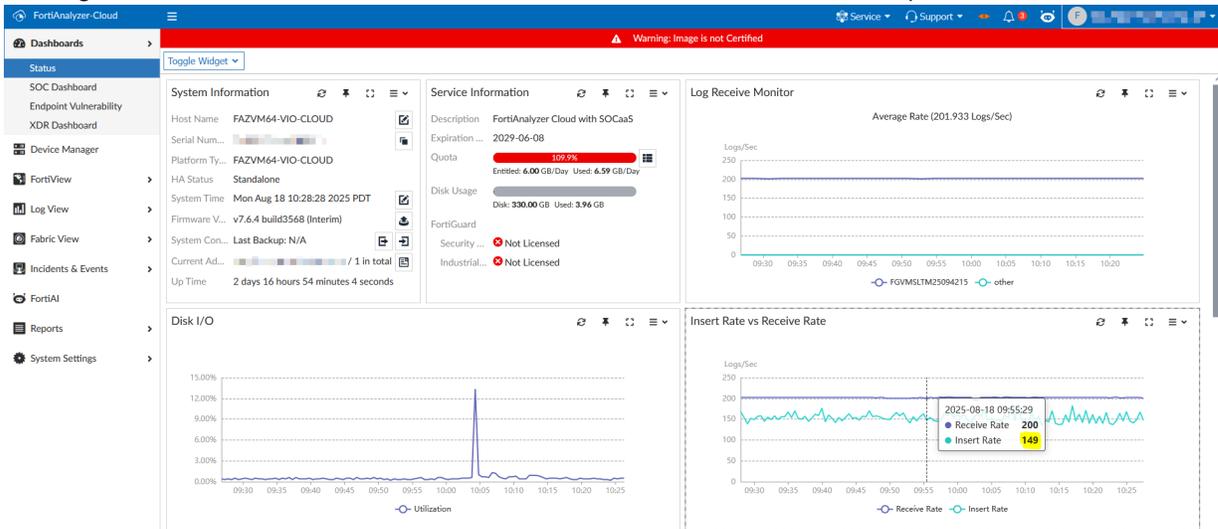

What occurs when all available tokens are consumed:

- When the number of remaining tokens is greater than the received log rate, tokens are consumed and the log's insert rate will match the receive rate.

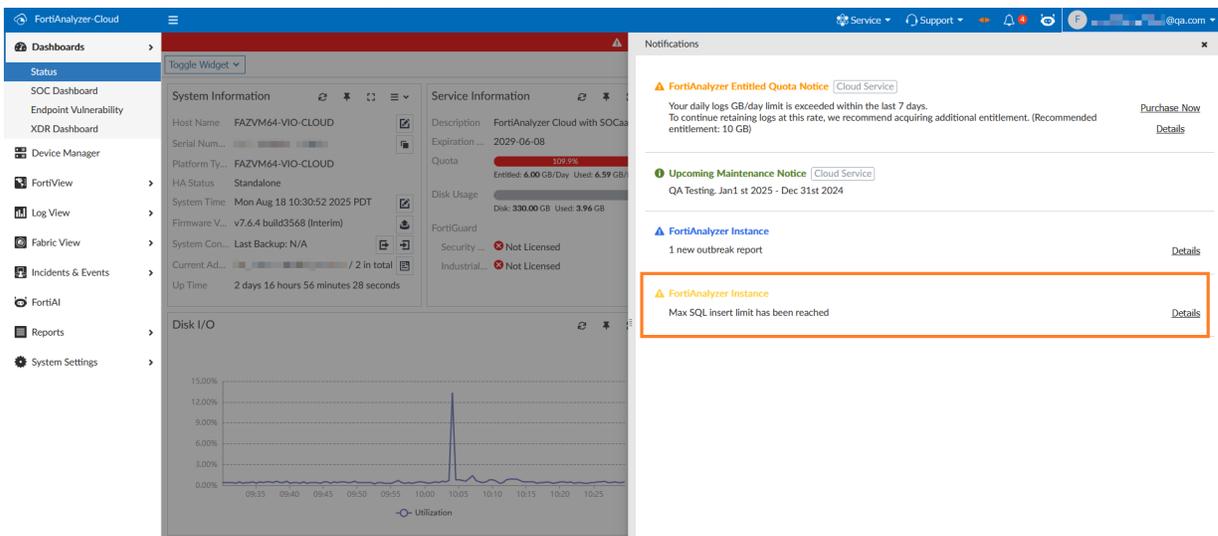

- When the log receiving rate surpasses the number of remaining tokens available, the following will occur:

- The log receive rate is unaffected but the insert rate is reduced to match the peak rate limit.

- Additional tokens will not be consumed to ensure the token amount does not drop below 0.
- Logs exceeding the rate limit are not inserted into the database.
- An alert is displayed in the notification drawer, and an event will be added to the event log with the message "Log database inserting rate was over limit" message.

Logging support and daily log limits
