Change Log

Date	Change Description
2023-01-27	Initial release.

Introduction

This guide provides release information for FortiSandbox Cloud version 23.3.4260 build 4260.

For information on deploying and maintaining FortiSandbox Cloud, see the [FortiSandbox Cloud 23.3.4260 VM Install Guide](#).

FortiSandbox Cloud build 4260 is based on FortiSandbox 4.2.0 build 0255. For the FortiSandbox features, refer to the [FortiSandbox 4.0.0 Release Notes](#).

Upgrade Information

Upgrade link not visible

If you are upgrading from beta build 4105 and the upgrade link on the Dashboard is not visible, you can only upgrade by going directly to the following URL on your browser:

`https://<account-id>.<region>.fortisandboxcloud.com/fortisandbox/about/sysupgrade`

Before and after any firmware upgrade

Before any firmware upgrade, save a copy of your FortiSandbox Cloud configuration by going to *Dashboard > System Configuration > Backup*.

After any firmware upgrade, if you are using the web UI, clear the browser cache before logging into FortiSandbox Cloud so that web UI screens display properly.

Upgrade path

FortiSandbox Cloud 23.3.4260 officially supports the following upgrade path.

Upgrade from	Upgrade to
22.2.1 Build 4151	23.1 Build 4245
22.2 Build 4134	22.2.1 Build 4245
22.1 Build 4113	22.2.1 Build 4134

Upgrade procedure

You can manually upgrade the FortiSandbox Cloud firmware, or download and upgrade the recommended or available builds.

To manually update the firmware:

1. Download the firmware image from the [Fortinet Customer Service & Support](#) portal.
2. Go to *System > Dashboard*. In the *System Information* widget, click the *View all firmware* icon next to *Firmware Version*. The *FortiSandbox Firmware Information* page opens.
3. Under *Upload Firmware*, click *Upload Firmware*.

4. Click *Upload File* and *browse* to the firmware image on your computer and click *Submit*.
5. Microsoft Windows Sandbox VMs must be activated against the Microsoft activation server if they have not been already. This is done automatically after a system reboot. To ensure the activation is successful, port3 of the system must be able to access the Internet and the DNS servers should be able to resolve the Microsoft activation servers.

Downgrading to previous firmware versions

Downgrading to previous firmware versions is not supported.

New features and enhancements

The following is a list of new features and enhancements in version 23.3.4260.

- Filter out unexpected queries from FortiGate for FortiGate detected viruses
- Improved the logic of checking user's service subscription".

Product Integration and Support

The following table lists FortiSandbox Cloud version 4.2.3 product integration and support information.
