Change log

Date	Change Description
2026-06-18	Initial release.

CTAP Cloud 26.2 Release Notes

The Cyber Threat Assessment Program (CTAP) is designed to help Fortinet partners give customers an in-depth view of the current state of their network. After deploying a FortiGate to monitor a customer's network for a short period of time, partners can generate a report and review any findings with key decision makers.

Customers who are looking to identify potential security gaps should request CTAP assessments through their authorized channel partners or Fortinet representatives.

For more information on CTAP Cloud, see the [CTAP Cloud User Guide](#).

Special Notices

There are no special notices for the CTAP Cloud 26.2 release.

What's New

New features for CTAP Cloud are included in the following releases:

- [What's new in 26.2 on page 7](#)
- [What's new in 26.1.a on page 7](#)
- [What's new in 26.1 on page 8](#)
- [What's New in 25.4.a on page 8](#)

What's new in 26.2

CTAP Cloud version 26.2 includes the following new features and products:

Localization supported in NGFW report

In addition to English, additional languages outputs are now supported in the NGFW assessment report including: Chinese, French, German, Italian, Japanese, Korean, Portuguese, and Spanish. See [Frequently asked questions](#) and [Product Integration and Support on page 9](#).

Dynamically select the FortiGate model from the serial number

When inputting the FortiGate serial number when creating a new assessment, available FortiGate models are displayed and can be selected for ease of input. See [Creating new assessments](#).

Lab assessment license

When creating a new assessment, select *Use my 1 free test/lab assessment* to use the free test license for lab use. See [Licensing](#) and [Creating new assessments](#).

Entitlement information in device details

In many of the device details pages and grids, there are drill-down options to pull FortiGuard licensing entitlements. This can help ensure that FortiGates are properly licensed prior to deploying them in the customer's network.

What's new in 26.1.a

CTAP Cloud version 26.1.a is a maintenance release. There are no new features included in CTAP Cloud 26.1.a. See [Resolved Issues on page 10](#) for more information.

What's new in 26.1

CTAP Cloud version 26.1 is a maintenance release. There are no new features included in CTAP Cloud 26.1.

What's New in 25.4.a

CTAP Cloud version 25.4.a includes the following new features and products:

FortiOS 7.6.4 support

This release supports FortiOS 7.6.4 on previous CTAP supported FortiGates (excluding 60/61E models) when performing NGFW assessments. FortiOS 7.6.4 support extends to virtual NGFW assessments (FortiGate VMs in VMware ESXi hypervisors) as well. See [Model and firmware support](#) in the CTAP Cloud User Guide.

Manually adding serial numbers when creating assessments

Sellers can now manually add a serial number (instead of having to select from a list of FortiGates registered to their FortiCloud users). This is useful when CTAP devices to be deployed are registered to other sellers in the same organization, distribution partners, or other borrowed devices.

Product Integration and Support

FortiOS device support

No additional models or firmware versions were added to this release of CTAP Cloud. See [Model and firmware support](#) in the CTAP Cloud User Guide for a full list of supported FortiGate models/firmware.

Web browser support

CTAP Cloud 26.2 supports the following web browsers:

- Microsoft Edge 80 and later (based on Chromium)
- Mozilla Firefox version 90
- Google Chrome latest three versions

Language support

CTAP Cloud 26.2 report supports the following languages:

- Chinese
- English
- French
- German
- Italian
- Japanese
- Korean
- Portuguese
- Spanish

Resolved Issues

Resolved issues for CTAP Cloud are included in the following releases:

- [Resolved issues for 26.2 on page 10](#)
- [Resolved issues for 26.1.a on page 10](#)
- [Resolved issues for 26.1 on page 10](#)
- [Resolved issues for 25.4.a on page 11](#)

Resolved issues for 26.2

The following issues have been fixed in version 26.2. For inquiries about a particular bug, please visit the [Fortinet Support](#) website.

Bug ID	Description
1243441	Improvements have been made for serial number validation through FortiCloud integration.
1259160	Fixes have been implemented for the auto-generated reports syncing.
1278649	Entitlement information has been included in FortiGate device details.
1304705	Localization supported in NGFW report.

Resolved issues for 26.1.a

The following issues have been fixed in version 26.1.a. For inquiries about a particular bug, please visit the [Fortinet Support](#) website.

Bug ID	Description
1241308	Improve the available CTAP Cloud engagement calculation logic.

Resolved issues for 26.1

There are no resolved issues with this release.

Resolved issues for 25.4.a

The following issues have been fixed in version 25.4.a. For inquiries about a particular bug, please visit the [Fortinet Support](#) website.

Bug ID	Description
1216663	Canceling an assessment results in an <i>unknown error</i> .
1223083	Improvements to assessment form validation.
1223619	Icons missing in NGFW report.
1225167	Test assessment should be excluded from total seat computation.
1228389	Error when generating report.

Known Issues

This section lists the known issues of this release. For inquiries about a particular bug, please visit the [Fortinet Support website](#).

Bug ID	Description
1223530	Some list options with special symbols show escape characters after completion.
