Change log

Date	Change description
2025-06-16	FortiPhish version 25.2.0 release document.

Introduction

FortiPhish is a phishing simulation service to analyze how internal users interact with phishing emails. Use FortiPhish to create custom phishing email campaigns and monitor how users respond to them. The FortiPhish portal contains dashboards with easy-to-read data analysis monitors to view responses across campaigns, and monitor improvements over time.

What's new

The following table lists new features in FortiPhish version 25.2.0.

Feature	Description
FortiPhish Alert Button	The FortiPhish Alert Button now features a new user interface and includes separate XML files for *Exchange Server* and *Exchange Online/Microsoft 365* to support Microsoft Graph API.
	Exchange Online/Microsoft 365 and hybrid users must update by *October 2025* to ensure continued functionality as Microsoft phases out legacy tokens. Refer to the FortiPhish Administration Guide for detailed configuration steps.
Campaigns	The following new features and enhancements are added. • You can now export a detailed campaign statistics to a CSV file. This export includes recipient risk grades, risk scores, email actions, user-agent details, action timestamps, and geo-locations. • New *URL and Landing Page Domains* are added and available for selection during campaign creation. • During campaign creation, the *Select Target Group* page now displays the number of members in a group.
Groups	You can now export group and smart group members information to a CSV file. This export includes member information, risk grade, risk score, and any synced Azure AD attributes.
Users	The *User Information* page now displays synced Azure AD attributes within the existing *User Info* card and displays the user's manager in *Manager* card, if available.
Domains	You can now search and sort domains in *Domains* page.

Known issues

The following issues are known is FortiPhish version 25.2.0. For inquiries about a particular issue, visit the
