Change log

Date	Change description
2025-10-22	FortiPhish version 25.4.0 release document.

Introduction

FortiPhish is a phishing simulation service to analyze how internal users interact with phishing emails. Use FortiPhish to create custom phishing email campaigns and monitor how users respond to them. The FortiPhish portal contains dashboards with easy-to-read data analysis monitors to view responses across campaigns, and monitor improvements over time.

What's new

The following table lists new features in FortiPhish version 25.4.0.

Feature	Description
System for Cross-domain Identity Management (SCIM)	A new <i>SCIM Token Management</i> page is now available under <i>Settings</i> to set up SCIM 2.0-based user provisioning, allowing you to import and sync users and groups from identity providers like <i>Microsoft Entra ID</i> .
LDAP Server	FortiPhish now supports manual or scheduled synchronization for your LDAP server to update user data.
Azure AD	Improved Azure AD performance with support for delta sync, ensuring faster subsequent user and group updates.
Groups	All imported users are now available for selection when you create a new group. You can also filter these imported users by their source.

Known issues

The following issues are known in FortiPhish version 25.4.0. For inquiries about a particular issue, visit the [Fortinet Support](#) website.

Issue ID	Description
1081459	Cannot edit the custom landing page title without uploading a zip file.
1107212	The risk grade for a group does not automatically recalculate after a member is deleted.

Resolved issues

The following issues have been resolved in FortiPhish version 25.4.0. For inquiries about a particular issue, visit the [Fortinet Support](#) website.

Issue ID	Description
1194393	The credentials popup overlaps with the Add Users popup when invalid LDAP credentials are provided during group creation.
