Change log

Date	Change description
2019-05-23	Initial release.

Introduction

This document provides the following information for FortiAP version 6.0.5, build 0037:

- [Supported models on page 5](#)
- [What's new in FortiAP version 6.0.5 on page 5](#)
- [Upgrade information on page 6](#)
- [Product integration support on page 7](#)
- [Resolved issues on page 8](#)
- [Known issues on page 9](#)

For more information about your FortiAP device, see the [FortiWiFi and FortiAP Configuration Guide](#).

Supported models

FortiAP version 6.0.5, build 0037 supports the following models:

Models
FAP-14C
FAP-21D, FAP-24D, FAP-25D
FAP-112D
FAP-221C, FAP-222C, FAP-223C, FAP-224D
FAP-320C, FAP-321C

What's new in FortiAP version 6.0.5

The following list includes FortiAP version 6.0.5 changes:

- Added Ethernet status information in the output of the CLI command `cw_diag -c wtp-cfg`
- Removed CLI commands:
 - `cw_diag -c ap-rogue`
 - `cw_diag -c sta-rogue`

Upgrade information

Upgrading from FortiAP version 6.0.0

FortiAP 6.0.5 supports upgrading from FortiAP 6.0.0 and later 6.0 patches.

Downgrading to previous firmware versions

FortiAP 6.0.5 supports downgrading to FortiAP 6.0.0 and later 6.0 patches.

Firmware image checksums

To get the MD5 checksum code for a Fortinet firmware image, perform the following steps:

1. Go to the [Fortinet Support](#) website.
2. Log in to your account. If you do not have an account, create one and then log in.
3. From the top banner, select **Download > Firmware Image Checksums**.
4. Enter the image file name, including the extension. For example, FAP_221C-v6-build0030-FORTINET.out.
5. Click **Get Checksum Code**.

Supported upgrade paths

To view all previous FortiAP versions, build numbers, and their supported upgrade paths, see the [Fortinet Documentation](#) website.

Product integration support

The following table lists product integration and support information for FortiAP version 6.0.5:

FortiOS	6.0.5 and later
Web browsers	Microsoft Internet Explorer version 11 and later
	Mozilla Firefox version 59 and later
	Google Chrome version 65 and later
	Apple Safari version 9.1 and later (for Mac OS X)
	Other web browsers may work correctly, but Fortinet does not support them.
FortiExplorer Lite (iOS)	2.1.0 (models FAP-21D, FAP-24D, FAP-112D, and FAP-320C only)

We recommend that the FortiAP firmware version be matched with the respective FortiOS version, when available. Other variations of FortiOS and FortiAP versions may technically work for the lowest common feature set. However, if problems arise, Fortinet Support will ask that the versions be matched, as recommended, before troubleshooting.

Resolved issues

The following issues have been resolved in FortiAP version 6.0.5. For inquiries about a particular bug, visit the [Fortinet Support](#) website.

Bug ID	Description
394972	Fix a kernel panic in the <code>rate_limit_set()</code> function call.
531629	The accounting start packet is not sent when the authenticated station reconnects to the CMCC captive portal SSID.
533332	The DHCP discover packet sometimes does not contain the parameter request list option.
536637	To reduce the memory usage, FortiAP no longer stores rogue AP data and rogue STA data received from FortiGate.
537569	FAP-221C, FAP-223C, and FAP-321C should not send Pause frames to the peer switch port.
545800	When IEEE 802.11r, 802.11k, or 802.11v is configured, FortiAP SSID disables local authentication.
554117	FortiAP to support the fully qualified domain name (FQDN) in the system name of the LLDP feature.

Known issues

There are no known issues in this release.
