# Change Log

Date	Change Description
July 23, 2024	Initial release.

## Introduction

This Release Notes covers the new features, enhancements, known issues, and resolved issues of FortiADC™ Manager Version 7.4.1, Build 0065.

FortiADC Manager allows you to use a web-based user interface to configure remote FortiADC devices. It allows you to simplify and speed up the FortiADC deployment and update process by maintaining configuration templates and policy packages that you can modify and apply as needed.

For additional documentation, visit <https://docs.fortinet.com/product/fortiadc-manager/>.

Consult the ADC Manager handbook for setup instructions.

FortiADC Manager 7.4.1 supports managing FortiADC 6.0.x or later versions.

---

## What's new

There are no new features in FortiADC Manager 7.4.1.

## Resolved issues

The following issues have been resolved in FortiADC Manager 7.4.1 release. For inquiries about particular bugs, please contact [Fortinet Customer Service & Support](#).

### Common Vulnerabilities and Exposures

For more information, visit <https://www.fortiguard.com/psirt>.

Bug ID	Description
1038961	FortiADC Manager 7.4.1 is no longer vulnerable to the following CVE-Reference: CWE-307: Improper Restriction of Excessive Authentication Attempts.

## Known issues

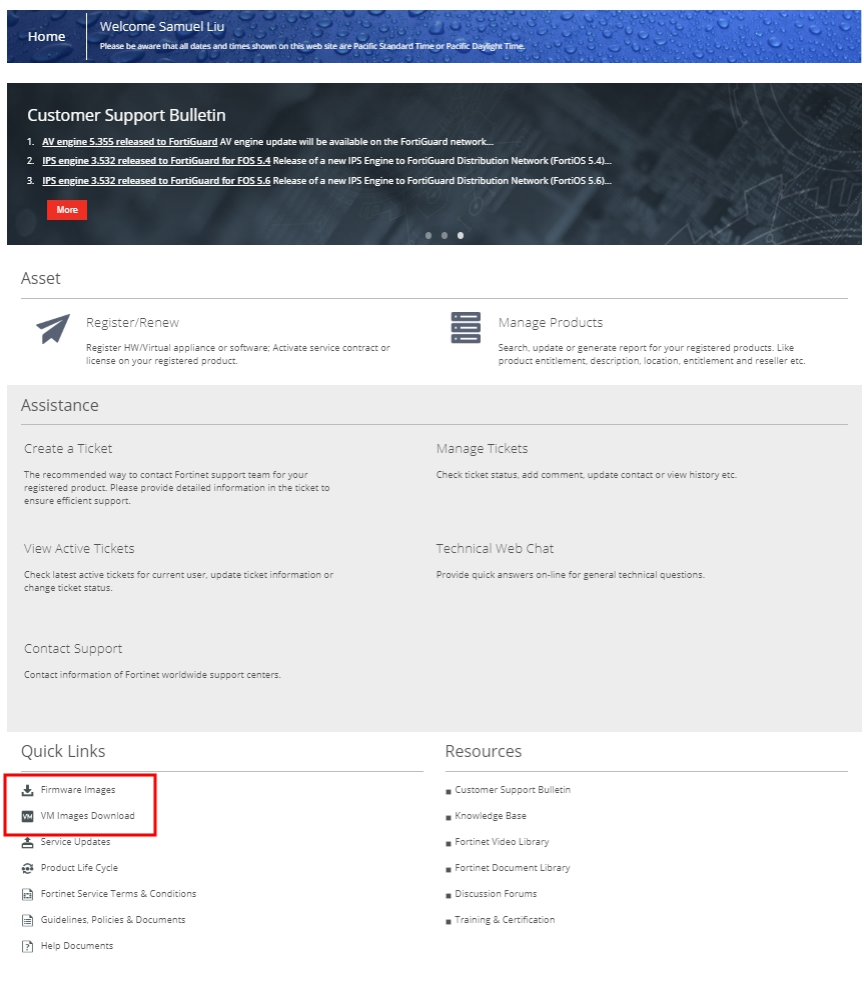

There are no known issues in FortiADC Manager version 7.4.1. For inquiries about particular bugs, please contact [Fortinet Customer Service & Support](#).

# Image checksums

To verify the integrity of the firmware file, use a checksum tool and compute the firmware file’s MD5 checksum. Compare it with the checksum indicated by Fortinet. If the checksums match, the file is intact.

MD5 checksums for Fortinet software and firmware releases are available from [Fortinet Customer Service & Support](#). After logging in to the web site, near the bottom of the page, click the Firmware Image Checksums button. (The button appears only if one or more of your devices has a current support contract.) In the File Name field, enter the firmware image file name including its extension, then click Get Checksum Code.

## Customer Service & Support image checksum tool

# System requirements

FortiADC Manager-VM requires at least 4 GB of RAM, and 33 MB for each data disk.
