Overview

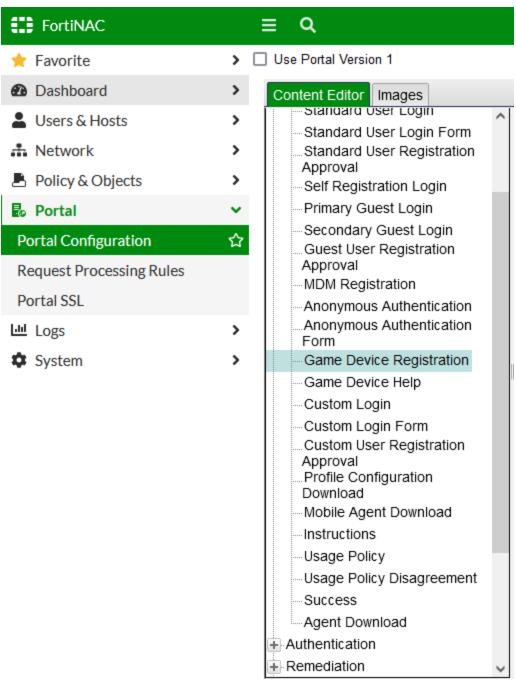

This document provides guidance on allowing clients to register their gaming devices through the Captive Portal.

Step 1: Configure Registration Portal Page

- 1. Connect to the Administration UI and navigate to **Portal > Portal Configuration**.
- 2. Expand Global then select Settings.
- 3. Next to **Game Console Registration Login Type:** select the desired authentication option from the drop down menu.

- 4. Click Apply to save changes.
- **5.** Select the appropriate portal then expand **Registration**.
- 6. Select Game Device Registration.

7. Complete the fields as appropriate. For details on each field, click the "?" next to the field, or refer to the Game device registration section under Content fields - Registration in the Administration Guide.

Validate Gaming Device OUI: By default, FortiNAC will not register a device whose vendor OUI is not listed in the database as a gaming device. To allow any device to register via the Gaming Device registration page, de-select this option. For details, see Vendor OUIs in the Administration Guide.

- 8. Click Apply to save changes.
- 9. To view the changes, open a separate window and browse to

https://<FortiNAC hostname or IP>/registration/GameRegister.jsp

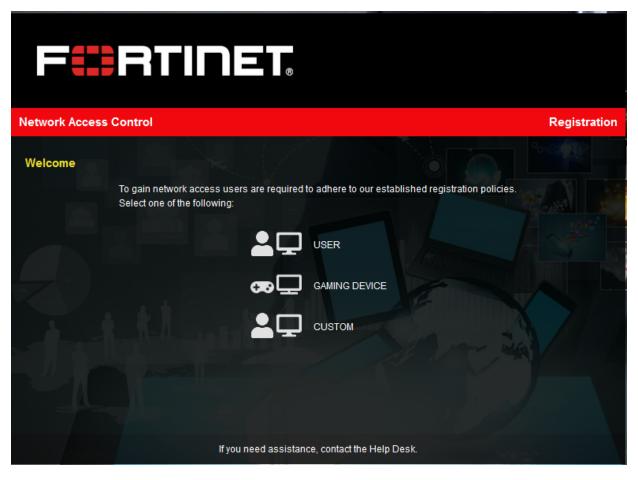

10. If additional changes are made in the Portal Configuration, refresh view in the second window to verify.

Step 2: Configure Login Menu

- 1. Under Login Menu, select Game Console Registration Enabled.
- 2. Complete the fields as appropriate. For details on each field, click the "?" next to the field, or refer to the Login menu section under Content fields Registration in the Administration Guide.
- 3. Click Apply to save.
- 4. To view the changes, browse to

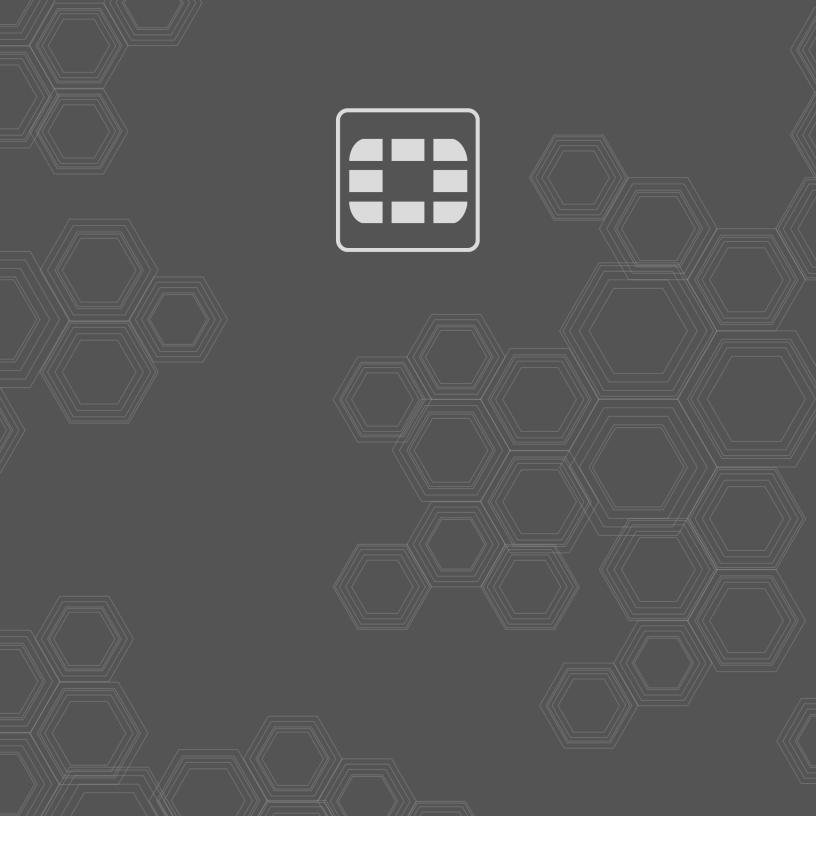

https://<FortiNAC hostname or IP>/registration/LoginMenu.jsp

Step 3: Validate

- 1. Connect an unregistered gaming device to the network.
- 2. Once the device is isolated, bring up the browser. The Login Menu should appear.
- 3. Select the Gaming Console title.
- 4. Fill in the required fields and click the **Register** button.
- **5.** In the Administration UI, search for the device's MAC address under **Users & Hosts > Adapters**. The Host Status should now appear as a gaming device icon.
- 6. The device is switched to the appropriate VLAN.

If the gaming device does not register, see KB article 190562 for troubleshooting.
