Change log

Date	Change description
2024-03-01	Initial release of the FortiFone Softclient for Android 7.0.2 Release Notes.

Introduction

This document provides a summary of new features, support information, upgrade instructions, and resolution of known issues in this FortiFone softclient for Android 7.0.2 release, build 65.

Special notices

- Bluetooth connectivity is supported within most vehicles.
- Android watches are not currently supported.

Supported platforms

The FortiVoice phone system and FortiVoice Cloud support the FortiFone softclient for Android 7.0.2 release.

The FortiFone softclient for Android 7.0.2 release has the following platform requirements:

- The FortiVoice phone system must use the firmware version 5.3.25 GA or higher.
- The operating system must be Android version 7.0 or higher.

Upgrade information

To update to the latest FortiFone softclient for Android release, visit the [Google Play Store](#).

What's new

The following list highlights some of the new features and enhancements introduced in the FortiFone softclient for Android 7.0.2 release:

- Emergency number support. When the user dials the emergency number (such as 911), the FortiFone softclient automatically redirects the call to the smartphone's native dialer to call the emergency number.
- PBX authentication
- SMS enhancements

Resolved issues

The following issues have been fixed in this release. For inquiries about a particular bug, contact [Fortinet Customer Service & Support](#).

Bug ID	Description
992368	The FortiFone softclient app crashes when trying to access the directory.
