Free three-day VPN access for FortiClient

After you install FortiClient 6.2.1, you get three-day free VPN access so that you can connect to a remote EMS for license activation. You must connect to the remote EMS to activate your license and unlock all supported FortiClient features.

After initial FortiClient installation, if FortiClient has not registered to any EMS, all FortiClient features are disabled except for Remote Access. You can use full FortiClient VPN functionality for three days. The FortiClient GUI shows that it is unlicensed and indicates the time that VPN will be available in this unlicensed state.

You can configure and establish a VPN connection to a FortiGate. This allows the endpoint to reach an EMS behind a FortiGate.

Following successful registration to EMS, FortiClient receives a full license if available from EMS. EMS enables all FortiClient features configured on the assigned endpoint profile, which may include Remote Access.

If FortiClient goes offline after registering to EMS, FortiClient features remain enabled for 30 days. You can still establish a VPN connection to the FortiGate in this scenario.

If FortiClient does not register to EMS or obtain a valid Fabric Agent license during the three-day free VPN access, the Remote Access feature becomes unavailable. At this point, the endpoint must be able to reach EMS without a VPN connection to connect to EMS. Upon successfully receiving a license from EMS, EMS enables all FortiClient features configured on the assigned endpoint profile.

30-day free trial support

EMS supports a 30-day free trial. After installing EMS, you can enroll for a 30-day free trial from the EMS GUI. This makes it easier for prospective customers to try the FortiClient product. If you want to extend your trial, you must contact Fortinet sales for an evaluation license.

To activate 30-day free trial support:

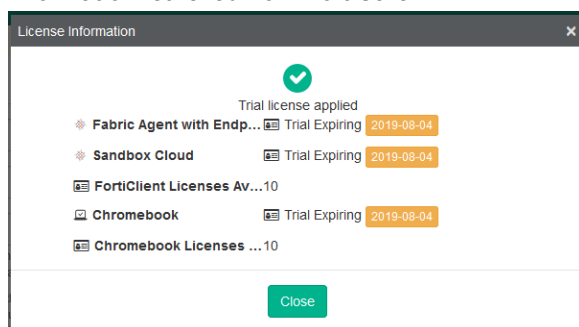

1. Download an EMS installation file from the [Fortinet support site](#) or obtain the file from Fortinet sales.
2. Install EMS.
3. If you do not have a FortiCare account, create a FortiCare account. You can create a FortiCare account in one of two ways:
 - a. Register directly on the FortinetOne website.
 - b. Register via the link on the EMS GUI. When you install and log in to EMS, EMS displays the following prompt if EMS is unlicensed. Click the *Try free for 3-days* button.

Click *Sign up now >>*.

On the FortinetOne registration page, create an account.

4. In EMS, in the *FortiCare Support Registration* dialog, enter your FortiCare email address and password.
5. Click *Login & Start Trial*. EMS retrieves a trial license from FortiCare. The following shows the trial license information retrieved from FortiCare.

6. Go to *Administration > Configure License*. Verify that your EMS has a 30-day trial license with ten seats for Windows, macOS, and Linux endpoints, and ten seats for Chromebook endpoints, with all features enabled.

The screenshot shows the 'Configure License' page in the FortiClient Endpoint Management Server. The left sidebar lists navigation options: Dashboard, Endpoints, Quarantine Management, Software Inventory, Endpoint Policy, Endpoint Profiles, Manage Installers, Profile Components, Telemetry Gateway Lists, Compliance Verification, Administration (selected), Administrators, Admin Roles, and User Servers. The main content area displays the following information:

- Serial number:** FCTEMS0000099291
- Hardware ID:** 553DBD88-E298-416F-9806-D18094E3917B-5A8C0CF7
- Fabric Agent with Endpoint Protection:** Trial Expiring 2019-08-04
- Sandbox Cloud:** Trial Expiring 2019-08-04
- FortiClient Licenses Used:** 0 out of 10
- Chromebook:** Trial Expiring 2019-08-04
- Chromebook Licenses Used:** 0 out of 10
- License Source:** FortiCare (selected) / File Upload
- FortiCare Support Account:** ledington@smartgrid.ca

At the bottom, there are three buttons: Sync License Now, Edit Account, and Delete Account.

After 30 days, EMS shows that the license expired.

This screenshot shows the same 'Configure License' page as above, but the trial licenses have expired. The status for 'Fabric Agent with Endpoint Protection', 'Sandbox Cloud', and 'Chromebook' is now 'Trial Expired 2019-08-04'. The 'License Source' remains 'FortiCare'.

A warning dialog box is displayed with the following text:

Warning: We didn't find any licenses for this EMS.
To purchase licenses, visit Fortinet Service & Support.

At the bottom of the dialog are three buttons: Purchase, Sync License Now, and Remind me tomorrow.

You can purchase a full license before or after the trial license expires. After upgrading to the full license using the FortiCare account created in step 3, go to *Administration > Configure License* and click the *Login & Sync License Now* button. EMS checks for and retrieves the full license from FortiCare.

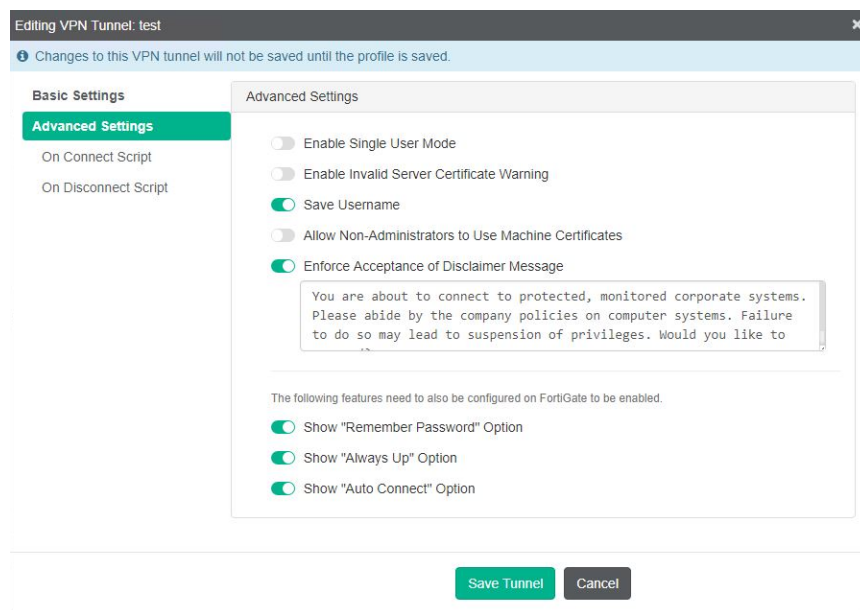

VPN option to enforce disclaimer acceptance

You can enforce acceptance of a disclaimer message before a remote user connects to IPsec or SSL VPN. You can use the disclaimer message to notify the end user of important points to remember when using FortiClient VPN.

This guide assumes that you have configured SSL VPN in FortiOS and it is ready to use.

To configure enforcing disclaimer acceptance:

1. In EMS, under *Endpoint Profiles*, select the desired profile.
2. On the *VPN* tab, edit an existing VPN tunnel, or create a new one.
3. On the *Advanced Settings* tab, enable *Enforce Acceptance of Disclaimer Message*. Enter a custom message in the text box.

4. Click *Save Tunnel*.

When a remote user establishes a VPN connection, the disclaimer message displays. If the user clicks *Accept*, the VPN connection establishes successfully. If the user clicks *Disconnect*, the VPN connection process terminates.

The disclaimer message displays under the following scenarios:

- When the user attempts to connect to VPN when *Auto Connect* and/or *Always Up* are enabled.
- Before the VPN connection establishes, if the endpoint restarts.
- With resilience configuration, when FortiClient connects to the primary or secondary FortiGate.
- When you have enabled *Show VPN before Logon*.

Change log

Date	Change Description
2019-07-18	Initial release.
2020-02-26	Added VPN option to enforce disclaimer acceptance on page 7 .
