Change Log

Date	Change Description
07/08/2021	Initial release.
03/16/2023	FortiSIEM version updated.
04/11/2023	FortiSIEM version updated.

FortiSIEM MEA 6.7.4 Release Notes

You can now run a FortiSIEM Collector as a management extension application (MEA) image on FortiAnalyzer 7.0.1 or higher. This alleviates the need for a separate FortiSIEM Collector node (Virtual machine or appliance), when you already have a FortiAnalyzer deployed, and it has sufficiently spare CPU, Memory and Disk available to run a FortiSIEM Collector.

A FortiSIEM MEA Collector functionally works the same way as a regular virtual machine based FortiSIEM Collector or a hardware appliance 500F, but the set up and upgrade processes are slightly different.

For general setup, troubleshooting, event collection, discovery and performance monitoring using a FortiSIEM MEA Collector, see the FortiSIEM MEA Collector Administration Guide in [FortiAnalyzer 7.0 docs](#). The FortiSIEM MEA Administration Guide also covers upgrade issues and general differences between a FortiSIEM MEA Collector and a virtual machine/hardware appliance Collector.

Note: To collect FortiSIEM Windows or Linux Agent logs via FortiSIEM MEA Collector, you need to run Windows Agent 4.1.2 or higher and Linux Agent 6.3.0 or higher. Fortinet recommends using the latest available version.
