FortiGate-as-a-Service Release Notes

This document provides a list of known issues, changes, and product integration information for FortiGate-as-a-Service (FGaaS) 26.2. Review all sections of this document before using this service.

What's New

New features for FortiGate-as-a-Service are included in the FortiGate-as-a-Service 26.2:

FortiGate order fields and price updates

Updates have been made to available FortiGate SKUs, bandwidth, and add-ons:

- **SD-WAN bundle:** FortiGate SD-WAN service bundles have been updated to account for deprecated add-ons. Changes and additions can be viewed in the *Service Bundle* and *Add-on* fields when configuring an order.
- **HA orders:** When configuring an HA order, the same SKU is applied to both units, resulting in the pricing being doubled. However, *Bandwidth* and *IPs* are not bundled together and should be chosen individually.

Pricing adjustments:

- FortiPoints prices have been adjusted to account for the changes.
- Due to the new price list updates, when a user applies add-ons to an existing order, the updated pricing values will be charged.

Supported FortiGate device models include the updates as follows:

- Single FortiGate-91G
