Change log

Date	Change description
2025-12-01	FortiPhish version 25.4.a release document.

Introduction

FortiPhish is a phishing simulation service to analyze how internal users interact with phishing emails. Use FortiPhish to create custom phishing email campaigns and monitor how users respond to them. The FortiPhish portal contains dashboards with easy-to-read data analysis monitors to view responses across campaigns, and monitor improvements over time.

What's new

The following table lists new features in FortiPhish version 25.4.a.

Feature	Description
Users	<ul style="list-style-type: none">• A new field, <i>Is department lead?</i>, is available on the <i>Edit User</i> page for configuring any recipient user as department lead and is displayed on the <i>User Information</i> page.• You can now add or modify <i>Department</i> and <i>Manager</i> information for manually added recipient users on the <i>Edit User</i> page.
UI Enhancements	The option to import users using CSV has been moved from the <i>Recipients > Groups</i> page to the <i>Recipients > Users</i> page and now allows you to import users without being required to create a group first.

Known issues

The following issues are known in FortiPhish version 25.4.a. For inquiries about a particular issue, visit the [Fortinet Support website](#).

Issue ID	Description
1230984	The <i>Campaign Risk Grade</i> is not calculated if the campaign only includes recipient users who are not part of any group.
1081459	Cannot edit the custom landing page title without uploading a zip file.
1107212	The risk grade for a group does not automatically recalculate after a member is deleted.
