Change Log

Date	Change Description
2022-08-01	Initial release of 7.0.3

FortiSOAR 7.0.3 Release

The Fortinet Security Orchestration, Automation, and Response Platform (**FortiSOAR™**) v 7.0.3 release contains multiple security fixes and updated OS packages to enhance stability and fix vulnerabilities in FortiSOAR.

The recommended minimum screen resolution for the FortiSOAR GUI is 1920 x 1080. Please adjust the screen resolution accordingly. Otherwise, the GUI may not display properly.

New features and enhancements

There are no new features introduced in this release. FortiSOAR v 7.0.3 release contains multiple security fixes and updated OS packages to enhance stability and fix vulnerabilities in FortiSOAR.

Special Notices

This section highlights some of the operational changes that administrators should be aware of in FortiSOAR version 7.0.3.

Release 7.0.3 is an upgrade-only release

To get the security fixes and updated OS packages included with 7.0.3, you can upgrade your FortiSOAR instance to 7.0.3 from 7.0.2; fresh installation of release 7.0.3 is not supported.

Upgrade Information

You can upgrade your FortiSOAR enterprise instance, High Availability (HA) cluster, or a distributed multi-tenant configuration to version 7.0.3 from versions 7.0.2 only. Also, once you have upgraded your configuration, you must log out from the FortiSOAR UI and log back into FortiSOAR.

Also, note that the upgrade procedure temporarily takes the FortiSOAR application offline while the upgrade operations are taking place. We recommend that you send a prior notification to all users of a scheduled upgrade as users are unable to log into the FortiSOAR Platform during the upgrade.

For details about upgrading FortiSOAR, see the *FortiSOAR Upgrade Guide*.

Product Integration and Support

Web Browsers

FortiSOAR 7.0.3 User Interface has been tested on the following browsers:

- Google Chrome version 103.0.5060.134
- Mozilla Firefox version 102.0.1
- Microsoft Edge version 103.0.1264.71

Virtualization

This section lists FortiSOAR version 7.0.3 product integration and support for virtualization:

- Amazon Web Service AMI, Amazon EC2, Amazon EBS
- VMware ESXi versions 5.5, 6.0, and 6.5
- Linux KVM Redhat 7.1

Resolved Issues

FortiSOAR release 7.0.3 contains multiple security fixes and updated OS packages to enhance stability and fix vulnerabilities in FortiSOAR.

Known Issues and Workarounds

The following is a list of some of the known issues in FortiSOAR release 7.0.3:

- **Issue #0830022:** The Assign to Role (s) dialog box on the Dashboards or Reports page, display two checkboxes for each role that is listed on that dialog box. This issue occurs in Google Chrome and Microsoft Edge browsers. This issue will be resolved in future releases of FortiSOAR.
